Product number 215-STL-PK600-2BK-SPR-GI106KS

Product description

Freestanding XXL parcel box GOETHE with 2 letterboxes and GIRA System 106 - video intercom right - airlock system - RAL of choice

Parcel delivery has changed considerably in recent years – today customers expect more flexibility and security than ever before. With the **Paketbriefkasten GOETHE** from Briefkasten Manufaktur you rely on an optimal combination of innovative technology and outstanding design, manufactured from high-quality stainless steel and aluminium, powder-coated in an RAL colour of your choice. Integrated is the **GIRA System 106**, whose modular design provides a particularly flexible and future-proof solution for your entrance. Three GIRA system modules are already included in the scope of delivery, so the letterbox is ready for immediate use. The appropriate GIRA indoor station and the necessary control unit to complete the system are also included. Thanks to the simple mounting system, the modules can be replaced or expanded at any time afterwards without great effort.

The **letterboxes** (W x H 400 x 200 mm) are made of stainless steel 1.4016 (corrosion-resistant, magnetic stainless steel), powder-coated in an RAL colour of your choice. They are equipped with an innovative Push-Key lock, keyed alike with that of the parcel box and supplied with ten keys. Mail insertion and retrieval are from the front. The insertion flaps are fitted with high-quality axle dampers, allowing mail to be inserted particularly quietly. The letterboxes comply with **DIN/EN 13724** with an insertion size of 3.5 x 36.0 cm – sufficient for C4 envelopes in landscape format without folding. The retrieval doors open downwards so that your post cannot fall out towards you. The dimensions of the letterboxes allow a capacity of approx. 64 litres. The innovative Push-Key lock is discreetly concealed inside: the key is simply inserted – without turning – and the door opens.

The generous **parcel box** (W x H 600 x 1200 mm) is also made of stainless steel 1.4016, powder-coated in an RAL colour of your choice. It has a volume of 192 litres and allows delivery of parcels up to a size of 555 x 375 x 305 mm (W x H x D), which corresponds to DHL parcel size L. The parcel insertion flap is damped and closes particularly quietly. Thanks to the specially developed delivery airlock, your parcel is automatically transported into the secured retrieval compartment after being inserted. The airlock is immediately ready for further deliveries and remains isolated from the retrieval compartment – so your consignments are always optimally protected. Any delivery service (e.g. DHL, DPD, TNT, GLS, Hermes) can use the parcel letterbox. Depending on placement, up to four DHL parcels of size M can even fit inside.

Briefkasten Manufaktur places the greatest importance on high-quality materials. Stainless steel provides extremely high corrosion resistance and an elegant surface finish. Quality assurance begins with the selection of our raw material suppliers and only ends when the parcel letterbox arrives with you in the required quality. Rely on the **Paketbriefkasten GOETHE** – a secure, flexible and stylish solution for your mail and parcel delivery. A product that combines traditional craftsmanship with the latest technology – Made in Germany by Briefkasten Manufaktur Lippe.

- High-quality parcel letterbox made of stainless steel and aluminium, powder-coated in the colour of your choice.
- Quality manufacture - Made in Germany by Briefkasten Manufaktur Lippe.
- Letterboxes (W x H 400 x 200 mm) made of stainless steel 1.4016 (corrosion-resistant magnetic stainless steel), powder-coated in an RAL colour of your choice with stainless steel laser inscription pictogram "BRIEF".
- 3 innovative Push-Key locks with 2 keys.
- Mail insertion and retrieval are from the front. Insertion flap with high-quality axle dampers for very quiet insertion of mail.
- The letterbox complies with DIN/EN 13724. Insertion size (3.5 cm x 36.0 cm) for C4 landscape – even large letters fit in here without being folded.
- Retrieval door opens from top to bottom. This prevents your post from falling towards you.
- Parcel box (W x H 600 x 1200 mm) made of stainless steel 1.4016 (corrosion-resistant magnetic stainless steel), powder-coated in an RAL colour of your choice with stainless steel laser inscription pictogram "PAKET".
- Parcel compartment volume: 192 litres, Max. parcel dimension: 555 x 375 x 305 mm (W x H x D), which corresponds to parcel size L.
- Parcel insertion flap with damping for quiet closing.
- Function compartment (W x H 200 x 400 mm) made of stainless steel 1.4016 (corrosion-resistant magnetic stainless steel), powder-coated in an RAL colour of your choice.
- Including GIRA apartment station(s) & control unit; System 106 speech module, call-button module & camera module installed.
- Optimal protection against rain thanks to drip edges and a rain hood made from 3 mm aluminium AlMg3 W19, powder-coated in an RAL colour of your choice.
- Side cladding made from 3 mm aluminium AlMg3 W19, powder-coated in an RAL colour of your choice.
- Rear panel made of 1 mm stainless steel 1.4301 V2A, powder-coated in an RAL colour of your choice.
- Base made from 40 x 40 x 2 mm stainless steel tube 1.4301 V2A, powder-coated in an RAL colour of your choice.
- Invisible fixing and cable routing within the post. Overall height is 1.65 m.

GIRA

Camera module Gira System 106 - 5561 000

- Behind the interchangeable black glass pane is a high-quality camera with high light sensitivity. Thanks to a detection angle of 100°, the user is always aware of what is happening at their front door.

Call-button module Gira System 106 - 5539 000

- With 4 commissioning buttons for staged installation.
- 2 x call button with labelling field 5547920.
- Call-button cover 5542920.

Speech module Gira System 106 - 5565 920

- Compact speech module for communication between inside and outside.
- A high-quality microphone and a weatherproof loudspeaker ensure clear communication.
- Power supply via 2-wire bus. Additional connection for ZV (e.g. required from the 3rd camera module).

Gira Video indoor station AP 7 1209xx

- Video indoor station with a 17.78 cm (7") TFT colour display and comfortable hands-free function for surface mounting or wall mounting with a flush-mounted device box or cavity wall box. With the optional stand (see Accessories) it is also suitable for placement on furniture. A 32 GB SD memory card is included in the scope of delivery for internal image storage. Full-surface glass front with touch functionality and tactile feedback.

Video control unit REG Gira 128800

- Control unit for supplying the audio and video components of the Gira door communication bus.
- Supplies the polarity-protected and short-circuit-proof 2-wire bus when using video components such as colour camera, TFT colour display.
- Up to 2 door stations with colour camera and 28 indoor stations with TFT colour display can be supplied via the Video control unit.
- In total, up to 15 colour cameras can be controlled by the Video control unit (5 video door stations and 10 TKS camera gateways), of which two door stations with colour camera can be supplied with power by the Video control unit. The remaining colour cameras must each be operated with their own power supply for door communication.
- Self-resetting electronic short-circuit and overload detection of the operating voltages and the bus connection.
- Buttons for system and door-opener programming.
- LED status indicators for operation, overload, system programming and door-opener programming.
- AC 12 V output for powering a conventional door opener.
- Relay output to switch a door opener with its own power supply.
- Door opener switching time continuously adjustable from 1 to 10 s.

Important information

Water protection

To achieve optimal water protection for your post, the letterbox or letterbox system should, if possible, be located under a canopy.

Mail is only protected from water if it is placed completely inside the box and the insertion flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the letterbox. This installation is protected against water ingress according to DIN EN 13724. Water ingress is not a reason for a complaint.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	GOETHE
Connection technology	2-wire
Number of bell push buttons	2 buttons
Functions	Newspaper compartment, Camera, Intercom, Parcel compartment
Functional box prepared for manufacturer	GIRA
Number of boxes	with 1 parcel box, with 2 letterboxes
Material	Aluminium AlMg3 W19, Stainless steel V2A 1.4301, Stainless steel 1.4016 (non-rusting magnetic stainless steel)
Mounting type	Free-standing
House number	House number as laser engraving
Name labelling	Laser-engraved
Removal of mail	On the front
Boxes by volume	Jumbo > 30 litres
