COMELIT Gateway for forwarding door-entry calls to a smartphone without an indoor station

Product number 1299-1406A4-SK9015A

Product description

COMELIT call forwarding module - Gateway

This gateway enables the door call for up to 4 users of a Simplebus 2 system with Art. 1209 or Art. 1210A to be received on the smartphone (iOS or Android) without having an internal intercom installed.

All you need for the function is the audio-video unit Art. 4681/4 or Art. UT2020/4, the power supply unit Art. 1209 or Art. 1210A. The gateway is connected to the router and registration takes place via QR code for each residential unit. The QR codes for Simplebus address 1, 2, 3 and 4 are included in the scope of delivery of Art. 1406A4 and there are no licence costs. **The module supports a maximum of 4 flats and 15 approved apps per flat.**

After installing the system and the free app for your smartphone (Apple iOS or Android), you can connect the two in just a few very simple steps. This also requires a one-off registration with the Comelit Cloud. You can then access your video intercom from anywhere in the world. The image and sound are transmitted smoothly and in high quality. Both communication and opening the front door or gateway are possible via the app.

It is also possible to install a 6721W or 6801W home station, see accessories.

Important information

Camera or intercom preparation

The intercom systems must be connected by an electrician. Contact your trusted electrician for planning, fitting and installation.

Product properties

Connection technology 2-wire
