Design letterbox pedestal GRIMM - rear removal - colour of your choice with Ekinex Dico IP video intercom system | ? Colour of your choice | Rear mail retrieval | Ekinex DICO

Product number 562-STL-PE-H-SPO-1-SF-EKX

Product description

Design Mailbox Column GRIMM with Ekinex Dico IP Video Intercom – A Masterpiece of Mailbox Manufacturing

The GRIMM mailbox column combines modern design with first-class workmanship – ideal for discerning builders and architects. Manufactured from high-quality stainless steel and entirely "Made in Germany" by the Lippe Mailbox Manufacturing, this model stands for durability, functionality, and stylish appearance. The powder-coated front panel made of 2 mm stainless steel V2A (1.4301) impresses with its timeless look and high corrosion resistance.

Particularly noteworthy is the seamless integration of the Ekinex IP Dico video intercom with the Delégo panel in sizes 4, 8, or 10 inches. This high-quality solution offers modern, IP-based door communication with touch control, intelligent management, and excellent image and sound quality. The precise fitting into the front panel creates a harmonious overall appearance – perfectly attuned to the architecture of modern residential and commercial buildings. The Delégo panels enable convenient control directly at the door or centrally within the building and provide diverse opportunities for building networking.

The GRIMM mailbox impresses with its modern design, high-quality craftsmanship, and thoughtful functionality. Equipped with a classic lever lock made of stainless steel including a dust cap, the locking mechanism is reliably protected from weather influences and ensures a long lifespan. Mail retrieval occurs conveniently from the back – ideal when the mailbox is integrated into a wall or fencing system. Mail entry takes place from the front and is supported by high-quality axle dampers that allow for a gentle and quiet closing of the drop flap. Thanks to the practical design, your mail remains secure in the box even when the flap is opened. The GRIMM is particularly flexible with its double mailbox system: the column can be installed during the shell construction phase, while the front panel is mounted only after the completion of the construction works. This protects the mailbox from dirt and damage during the construction period and ensures a perfect appearance upon moving in.

Thanks to the DIN/EN 13724 standard, the GRIMM is ideally suited for large letters in C4 format, which can be inserted without creasing. The GRIMM mailbox impresses with its durable quality, timeless design, and thoughtful functionality.

A special feature of the Design Mailbox Column GRIMM is the fully welded stand column made of solid stainless steel V2A 1.4301 powder-coated in the chosen colour. This design guarantees maximum stability and an exceptionally long lifespan – even with continuous outdoor use. The fully welded construction creates a seamless, robust body without visible screws or plugs, which not only enhances the elegant appearance but also prevents the intrusion of moisture and dirt. The precisely ground seams ensure a homogeneous appearance and give the column a particularly high-quality look. Additionally, the construction allows for invisible cable management within the column, so all electrical connections for the Ekinex video intercom as well as other smart home components can be installed safely and securely. This unique manufacturing process sets new standards in design and functionality, making the GRIMM mailbox column a future-proof solution for modern architectural projects.

- High-quality mailbox column entirely made of stainless steel for freestanding installation.
- Front panel made of 2 mm stainless steel V2A 1.4301, powder-coated in the desired colour.
- Quality manufacturing – Made in Germany by Lippe Mailbox Manufacturing.
- Integrated Ekinex video intercom Dico IP door phone 5” (Art. No. EK-5DP-VI) with Delégo panel available in sizes 4, 8, or 10 inches.
- High-quality lever lock including 2 keys with key number.
- The rear retrieval door with an opening limiter opens from top to bottom to prevent mail from falling out.
- Front entry with high-quality axle dampers for very quiet mail insertion.
- DIN/EN 13724 compliant mailbox, drop size (3.5 cm x 32.5 cm) for C4 flat – even large letters remain intact. Additional retrieval protection made of stainless steel integrated.
- Optimal weather protection through a set-back panel.
- Double mailbox system: The panel can be comfortably installed after the completion of construction works and can be replaced at any time.
- The fully welded stand column is made of 2 mm stainless steel V2A 1.4301, powder-coated in the desired colour. The construction height is 1.70 m.
- Invisible cable routing through the body is possible.
- The column is equipped with a base plate made of VA. This is 10 mm thick and is finished with a cover plate, thus concealing the fixing dowels.

Important Information:

To achieve optimal water protection for your mail, the mailbox or mailbox system should preferably be located under a canopy.

Mail is only protected from water if it is completely placed in the box and the drop flap is closed. Partially inserted mail allows moisture and dirt to enter the mailbox. This system is protected against water ingress according to DIN EN 13724. Water ingress is not a valid reason for complaint.
