Designer wheelie bin enclosure ARENDT for 2 wheelie bins – RAL 7016 Anthracite grey | 2-fold

Product number 351-2

Product description

ARENDT wheelie bin store for 2 wheelie bins – two containers in a single unit

The ARENDT wheelie bin store for 2 wheelie bins combines two separate bays into a cleanly designed single unit. Both bins remain independently accessible and can be comfortably positioned and removed via their own front doors.

Separate top lids with gas struts support convenient filling. The construction of galvanised steel with a powder-coated finish in RAL 7016 Anthracite grey is suitable for modern private and commercial outdoor areas.

Each bay is suitable for wheelie bins with a capacity of 60, 120 or 240 litres. Ventilation openings in the doors support air exchange within the unit.

The advantages of the ARENDT wheelie bin store at a glance

Two wheelie bins neatly combined

Two refuse containers are housed within a single unit, creating a noticeably tidier appearance than freestanding bins placed side by side.

Galvanised steel for outdoor use

The robust construction is made from galvanised steel with a material thickness of approx. 0.8 mm and is designed for outdoor use.

RAL 7016 Anthracite grey

The powder-coated surface provides a restrained, modern look and helps protect the steel from typical weathering effects.

Two independently operable automatic lids

Each bay has its own top lid with a gas strut. This allows both wheelie bins to be filled comfortably and independently of each other.

Modular and extendable

The 2-bay unit can be combined with additional ARENDT modules. For example, adding a single module creates a unit for three wheelie bins.

Equipment of the ARENDT wheelie bin store

Construction and surface

Configuration For 2 wheelie bins
Suitable wheelie bins 60 / 120 / 240 litres per bay
Material Galvanised steel
Material thickness approx. 0.8 mm
Surface RAL 7016 Anthracite grey, powder-coated

Ease of use

Access 2 front doors operable separately
Loading 2 separate top lids
Lid support Gas struts with 80 N per lid unit
Ventilation Ventilation openings in the front doors
Expandability Can be combined with additional ARENDT modules

Installation and scope of delivery

Installation type Free-standing installation with ground fixing
Mounting hardware Included
Instructions Assembly and operating instructions included
Intended use Single-family homes, front gardens and outdoor areas

Note on ground fixing

The wheelie bin store should be placed on a level and sufficiently load-bearing surface. Fasteners and ground fixings should be selected according to the existing substrate and, if necessary, adapted to local conditions.

Note on use

After installation, check the free movement of the top lids and their connection to the respective wheelie bin lids. Doors and lids must be able to move freely and independently of one another.
