Product number 562-UP-SPL-1-VA-GI106KS

Product description

Design Letterbox GRIMM® – A Masterpiece of Mailbox Manufacturing

The Design Embedded Letterbox GRIMM combines modern design with top-notch craftsmanship – ideal for discerning builders and architects seeking an elegant solution for the integration of the Gira System 106. Manufactured from high-quality stainless steel and fully “Made in Germany” by the Lippe Mailbox Manufacturing, this model stands for durability, functionality, and stylish appearance. The polished front panel made from 2 mm stainless steel V2A (1.4301) impresses with a timeless look and high corrosion resistance. The flush design allows for seamless integration of up to three GIRA 106 system modules via a well-thought-out mounting system. Three GIRA system modules are included, enabling immediate installation of the letterbox. The matching GIRA apartment station and control unit to complete this letterbox are included. The modules can be easily exchanged later thanks to the simple mounting system.

The letterbox GRIMM® is not only a visual highlight but also leads in terms of functionality and quality. Thanks to the innovative push-key lock, the letterbox can be easily and comfortably operated with one hand. Open the door with a push and close it without using a key. The lock is optimally protected against weather influences. Additionally, the letterbox features an intelligent retrieval system: The door opens from top to bottom, ensuring that the mail stays securely inside and won't fall out. Mail is also conveniently inserted from the front, while high-quality axle dampers ensure a smooth closure of the mail slot. Unique to the GRIMM is the double box system: The installation box can be placed during the rough construction phase, while the front panel is mounted only after construction is completed – for maximum future flexibility and protection against dirt and dust during the building phase. The input box is made from stainless steel 1.4016 and features pre-punched cable entries on all sides to facilitate easy electrical installation.

Thanks to the DIN/EN 13724 standard, the GRIMM is ideal for large letters in C4 format, which can be inserted without creasing. The letterbox GRIMM® impresses with its durable quality, timeless design, and thoughtful functionality.

Briefkasten Manufaktur Lippe GmbH

Geschäftsführer Oliver Woineck
Ust.ID.Nr. DE303690847
Handelsregister Amtsgericht Lemgo, HRB 8618

- High-quality letterbox made entirely of stainless steel for embedded installation.
- Front panel made from 2 mm stainless steel V2A 1.4301, polished.
- Quality manufacturing – Made in Germany by Lippe Mailbox Manufacturing.
- Includes GIRA apartment station & accompanying control unit, System 106 door station module, info module & camera module installed.
- Innovative push-key lock including 2 keys with key number, convenient closing without a key, optimally protected against weather.
- The retrieval door with opening limiter opens from top to bottom to prevent the mail from falling out.
- Front insertion with high-quality axle dampers for very quiet insertion of mail.
- DIN/EN 13724 compliant letterbox, insertion size (3.5 cm x 32.5 cm) for C4 horizontal – even large letters remain intact. Additional retrieval protection integrated from stainless steel.
- Optimal weather protection through recessed panel.
- Double box system: Ideal for embedded installation. The panel can be conveniently installed after construction work is completed.
- Input box made from stainless steel 1.4016 (non-rusting, magnetic stainless steel) with pre-punched cable entries on all sides.

GIRA

Camera Module Gira System 106 - 5561 000

- Behind the replaceable black glass pane lies a high-quality camera with high light sensitivity. With a detection angle of 100°, the user is always informed about what is happening in front of their door.

Info Module Gira System 106 - 5560 920

- For house numbers that need to be displayed prominently.

Door Station Module Gira System 106 - 5565 920

- Compact audio module with integrated call button for communication between the inside and outside.
- A high-quality microphone and a weatherproof speaker ensure good communication.
- Power supply via 2-wire bus. Additional connection for ZV (e.g. needed from 3 camera modules).
- All other System 106 modules (except the audio module) are powered via the door station module.

Apartment Station Gira Video AP 7 1209xx

- Video apartment station with a 17.78 cm (7") TFT colour display and comfortable hands-free function for surface-mounted or wall-mounted installation with an embedded device box or hollow wall box. With the optional stand (see accessories), it is also suitable for placement on furniture. A 32 GB SD memory card is included for internal image storage. Full-glass front with touch functionality and tactile feedback.

Control Unit Video REG Gira 128800

- Control unit for powering the audio and video components of the Gira door communication bus.
- Supply of the polarity-safe and short-circuit-proof 2-wire bus when using video components such as colour camera and TFT colour display.
- Up to 2 door stations with colour camera and 28 apartment stations with TFT colour display can be supplied via the video control unit.
- In total, up to 15 colour cameras can be controlled by the video control unit (5 video door stations and 10 TKS camera gateways), of which two door stations with colour camera can be powered by the video control unit. The other colour cameras must be operated with a separate power supply for door communication.
- Self-resetting electronic short circuit and overload detection of operating voltages and bus connections.
- Buttons for system and door opener programming.
- LED status indicators for operation, overload, system programming, and door opener programming.
- AC 12 V output for supplying a commercially available door opener.
- Relay output for switching a door opener with its own power supply.
- Door opener switch time continuously adjustable from 1 to 10 seconds.

Important Information:

To achieve optimal water protection for your mail, the letterbox or mailbox system should ideally be located under a canopy.

Mail is only protected from water if it is completely deposited inside the box and the insertion flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the letterbox. This system is protected against water ingress according to DIN EN 13724. Water ingress is not a valid reason for complaint.

Product properties

Series	GRIMM
Connection technology	2-wire
Number of bell push buttons	1 Taster
Functions	Camera, Intercom
Functional box prepared for manufacturer	GIRA
Material	Stainless steel V2A 1.4301, Stainless steel 1.4016 (non-rusting magnetic stainless steel)
House number	House number as laser engraving
Name labelling	Laser-engraved
Removal of mail	On the front
Number of boxes	with 1 letterbox
Surface/colour	Brushed
Boxes by volume	Large > 16 litres
Mounting type	Flush-mounted

Dimensions

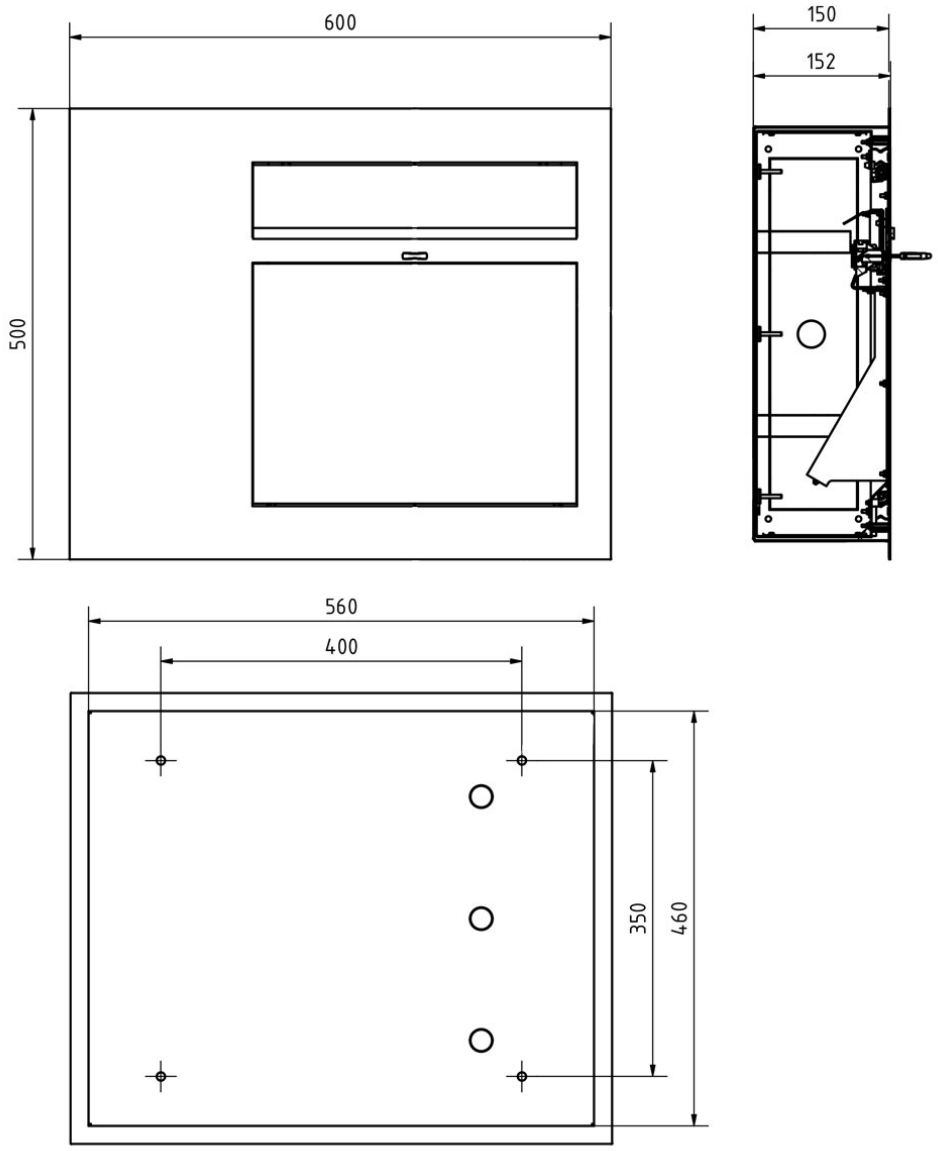

Height of single box in mm	460.0
Width of single box in mm	560.0
Capacity in litres	26.0
Height of letterbox slot in mm	35.0
Width of letter slot in mm	325.0
Height of letterbox in mm	External dimensions 500.0 | Installation dimensions 460.0
Width of letterbox system in mm	External dimensions 600.0 | Installed dimensions 560.0
Depth in mm	150.0
Weight in kg	19
Delivery condition	Delivery is provided assembled.
