XXL parcel letter box BASIC Plus 863X STL - Design Elegance 1 - Colour of your choice

Product number 863X-STL-XXL-E1-PK1-BK1

Product description

XXL parcel letter box BASIC Plus 863X STL with parcel compartment 550x770 and letter box 550x220 - colour of your choice

The BASIC Plus parcel letter box with XXL parcel compartment and stainless steel cover from Briefkasten Manufaktur is the ideal solution for the convenient and secure receipt of mail and large parcels - around the clock, protected from the weather and independent of the delivery service. Developed for use in **detached houses, office buildings and public facilities**, the system impresses with its clear lines, modular design and durable materials of uncompromising quality.

A particular highlight is the generous XXL parcel compartment with a volume of 161 litres. Measuring 550 x 770 x 380 mm (WD), it offers sufficient space for particularly large parcel consignments up to a maximum size of 520 x 730 x 350 mm. The practical **push lock with mechanical parcel lock** enables delivery without the need for a delivery person: the parcel compartment is simply filled by the delivery person and securely locked by pressing it shut - without any electronics or app. Removal is carried out by the authorised user using a key.

The letterboxes themselves measure 550 x 220 x 380 mm (WD) and are designed for **convenient mail removal from the front**. The door opens from left to right. Insertion openings in C3 format (transverse from the front) ensure that even large letters can be delivered securely and without creasing. It goes without saying that the system **conforms to DIN EN 13724**.

Each BASIC Plus system is supplied powder-coated in the **colour of your choice** - for perfect integration into any architectural environment, whether new or existing. The side panelling fits snugly and has an integrated rain edge that protrudes forwards. The roof panel is made of 3 mm aluminium, the rear panel of 1 mm stainless steel (V2A 1.4301), both also powder-coated. The stable base made of 40 x 40 x 2 mm stainless steel tube (V2A) guarantees secure installation - thanks to concealed screw fittings, the design remains clear and elegant.
