DoorBird plug-in power supply with 4 country adapters (EU, US, UK, AU), 100–240 VAC to 15 V DC @ 1 A

Product number 1298-NT15V

Product description

DoorBird 15V plug-in power supply

The DoorBird 15V plug-in power supply is used to power compatible DoorBird devices when power over Ethernet is not available or when a separate power supply is deliberately preferred. It is suitable for selected DoorBird IP video door stations, indoor and auxiliary devices, and accessory components.

The power supply converts an input voltage of 100 - 240 V AC to 15 V DC with a 1 A output current. With the included country adapters for EU, US, UK and AU it is flexible to use and can serve as the appropriate power supply for DoorBird devices depending on the installation environment.

Separate power supply for DoorBird installations

The plug-in power supply is particularly suitable when there is no PoE switch or PoE injector available at the installation site. If the connected DoorBird device is already powered via PoE, this power supply is not required.

Product	DoorBird 15V plug-in power supply
Function	Plug-in power supply for powering compatible DoorBird devices
Input voltage	100 - 240 V AC
Output voltage	15 V DC
Output current	1 A
Country adapters	Suitable country adapters for EU, US, UK and AU included
Compatibility	DoorBird D11x IP video door stations DoorBird D21x IP video door stations DoorBird IP door chime A1061W DoorBird IP I/O door controller A1081 DoorBird Internet Firewall A1051 DoorBird Smart Door Controller D410 DoorBird 4D Security Radar motion sensor A8008
PoE note	Not required if the connected device is powered via PoE
EAN	4260423867314
Manufacturer article number	423867314
Scope of delivery	1 x DoorBird 15V plug-in power supply Country adapters for EU, US, UK and AU

Notes

- The plug-in power supply is intended only for compatible DoorBird devices requiring 15 V DC.
- If the DoorBird device is already powered via PoE, the plug-in power supply is not required.
- Compatibility must be checked before installation according to the connection specifications of the respective DoorBird device.
- Installation must be carried out by a qualified electrician.
