Module with motion detector - ESYLUX MD-C 360i/6 mini | RAL 9007 grey aluminium, fine-structure matt

Product number BML-9860-STKD-376-BWM-C360-9007

Product description

Module with motion detector – ESYLUX MD-C 360i/6 mini

The modular motion detector module is the ideal addition for modular column solutions and enables the integration of a compact ESYLUX motion detector for automatic switching of lighting. It was specifically designed for use in ORDO socket columns and is ideally suited to entrance areas, walkways, driveways and functional outdoor areas around buildings.

The motion detector module is designed for neat, secure and service-friendly installation. The detector is inserted into the designated module mounting and integrates unobtrusively into the overall appearance of the column. Thanks to the modular design, individual components can be quickly exchanged or retrofitted if required, reducing maintenance effort and downtime.

The ESYLUX MD-C 360i/6 mini is a compact ceiling motion detector with a 360° detection angle and a detection area of up to 28 m². The detection range is laterally up to Ø 6 m and frontally up to Ø 2 m. This makes the detector particularly suitable for demand-based control of lighting in areas where the light should be switched on automatically only when there is movement.

The motion detector operates in on/off mode at a nominal voltage of 230 V and features a light channel for switching the lighting. The hold time can be adjusted in steps from 60 seconds to 15 minutes. The brightness threshold can be set between 5 and 2,000 lx so that the lighting is only activated when required and depending on the ambient brightness.

The housing, made from UV-stabilised PE, is finished in opal matt white and has an IP65 protection rating. Configuration is possible via ESY-Pen with the ESY-App or via a suitable IR remote control. This allows the motion detector to be conveniently configured, remotely controlled and documented.
Module colour: RAL 9007 grey aluminium, fine-textured matt
