8-compartment stainless steel freestanding letterbox Design BASIC Plus 385 XP SP with bell box - RAL colour of your choice | Left | ? Colour of your choice | with 8 mailboxes

Product number 385XP-8S-SP-L

Product description

Freestanding mailbox system BASIC Plus 385XP ST-T with bell/intercom unit for 8 households – bell unit left / S-configuration

The freestanding BASIC Plus 385XP ST-T mailbox system for 8 households combines robust stainless steel mailboxes with an integrated bell/intercom unit. Mailbox system and visitor communication are thus brought together in a stable, visually unified entrance solution for larger apartment buildings, residential complexes and commercial properties. In this version, the bell/intercom unit is positioned on the left.

The mailboxes are made from stainless steel V2A and are professionally powder-coated in a RAL colour of your choice. Particularly noteworthy are the solid support posts made from anodised aluminium profile: these are also powder-coated, executed for high stability and provide an exceptionally robust base for the entire mailbox system. Stainless steel and solid aluminium combine durability with a clear, high-quality architectural appearance.

Each mailbox measures 300 × 110 × 385 mm (W × H × D) and offers approx. 12 litres of volume. The 35 × 265 mm insertion slot is designed for DIN C4 items in portrait orientation. A noise-damping rubber lip on the insertion flap, front-facing mail retrieval, a robust lock and the interchangeable name plate ensure convenient everyday use.

The advantages of the BASIC Plus 385XP ST-T system at a glance

Mailbox and bell in one system

8 mailboxes are combined with a bell/intercom unit. This reduces additional single components at the property entrance and ensures an orderly overall appearance.

Solid aluminium support posts

Solidly manufactured, anodised aluminium profiles form the particularly robust base of the system. The powder-coated profile construction is designed for high stability and long-term outdoor use.

DIN C4 insertion with 12 litre volume

The 300 × 110 × 385 mm mailboxes each provide approx. 12 litres of mail volume. The 35 × 265 mm insertion slot accepts DIN C4 mail in portrait format.

Bell/intercom unit prepared

The integrated bell/intercom unit creates a central location for doorbell buttons and the integration of compatible intercom technology. The electrotechnical components are implemented to suit the planned system.

BASIC Plus – built for high durability

The consistent combination of stainless steel V2A and solid aluminium profiles makes the 385XP an especially robust mailbox system. The modular construction simplifies installation, maintenance and the later replacement of individual components.

Equipment of the BASIC Plus 385XP ST-T mailbox system

Mailbox system

Number of mailboxes 8 individually lockable compartments
Single compartment 300 × 110 × 385 mm (W × H × D)
Mail volume Approx. 12 litres per mailbox
Mailbox material Stainless steel V2A, powder-coated in RAL colour of choice
Insertion slot 35 × 265 mm, suitable for DIN C4 portrait
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and additional functions

Bell/intercom unit Integrated into the mailbox system
Position Left
Doorbell buttons Matching the number of households
Intercom technology Prepared for a compatible door communication solution
Electrical connection To be provided on site according to the chosen intercom system
Note Intercom system and connection components depend on the selected configuration

Solid aluminium support posts

Support posts Solid anodised aluminium profile, powder-coated
Construction Designed to be particularly robust and load-bearing
Surface RAL colour matching the mailbox system
Installation Freestanding installation on a suitable foundation
Side cladding Close-fitting design
BASIC Plus Modular, maintenance-friendly and designed for installation

Note on the bell/intercom unit

The specific intercom technology, power supply and cabling depend on the selected door communication solution. Installation and connection should be carried out by appropriately qualified professionals.

Foundation and secure installation

The solid aluminium support posts require a level and sufficiently load-bearing surface or a suitably dimensioned concrete foundation. Foundation size, anchoring and alignment must be matched to the system weight, size, ground conditions and local loads.

Note on weather protection

A weather canopy, close-fitting side cladding and rain drainage channels support weather protection. Mail items must be fully inserted so that the insertion flaps can close completely.

BASIC Plus – robust and modular

The BASIC Plus construction relies on stainless steel V2A and solid aluminium profiles. The modular design simplifies installation and the later replacement of individual components and is designed for a long service life.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	BASIC
Number of bell push buttons	8 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Material	Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Mounting type	Free-standing
Removal of mail	On the front
Number of boxes	with 8 letterboxes
