# 4-unit (4x1) freestanding mailbox system Design BASIC 385220 7016 ST-R - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | with 4 mailboxes (1x4) | 300x220x385 mm (WxHxD) - ???? Large 25 litres

**Product number** 385220-7016-4S

## Product description

## Freestanding mailbox system BASIC 385220 for 4 households – narrow version – RAL 7016 Anthracite grey

The BASIC 385220 is designed as a particularly spacious freestanding mailbox solution for 4 households. Approximately 25 litres of volume per mailbox provide plenty of space for daily mail, magazines and larger consignments.

The mailboxes are made of galvanised steel and are powder-coated in RAL 7016 Anthracite grey fine-textured matt. The rain canopy and side panels join the individual mail compartments into a unified, linear overall unit.

The narrow S version uses the available system width especially efficiently and arranges the large-volume mail compartments in a more vertically oriented configuration.

Each compartment features an insertion opening measuring 35 × 265 mm for DIN C4 items in portrait format. A noise-damping rubber lip reduces impact noise; mail is retrieved from the front via doors that open from left to right. Each mailbox is supplied with two keys with key number and an interchangeable nameplate.

## The advantages of the BASIC 385220 at a glance

### Solid stainless-steel support posts

Round-tube support posts with approx. 60 mm diameter made of brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for permanent use at the property entrance.

### Large-volume 220 mm version

With approx. 300 × 220 × 385 mm per mailbox, the BASIC 385220 offers around 25 litres of postal volume. This is particularly practical for higher mail volumes or longer collection intervals.

### Large insertion opening to DIN EN 13724

The insertion opening of 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can also be inserted without having to be folded.

### Screw mounting or concreting-in

Depending on the version, the stainless-steel support posts are either screwed to a load-bearing foundation or permanently cast into concrete. This allows the system to be installed to suit the structural situation.

### Robust large-capacity system Made in Germany

The combination of galvanised steel, large 25-litre mail compartments, solid stainless-steel support posts and an assembly-friendly design makes the BASIC 385220 a particularly robust solution for daily use.

## Equipment of the BASIC 385220 mailbox system

### Mailbox system

**Number of mailboxes** 4 individually usable mail compartments
**Design** Narrow, vertically oriented freestanding system
**Mailbox material** Galvanised steel
**Finish** RAL 7016 Anthracite grey fine-textured matt
**Mailbox dimensions** Approx. 300 × 220 × 385 mm per compartment
**Mail volume** Approx. 25 litres per mailbox
**Manufacture** Made in Germany by Briefkasten Manufaktur Lippe

### Mail and operation

**Insertion opening** 35 × 265 mm, suitable for DIN C4 portrait
**Insertion flaps** With noise-damping rubber lip
**Mail retrieval** From the front
**Door opening** From left to right
**Keys** 2 keys with key number per mailbox
**Nameplate** Interchangeable nameplate below the insertion flap
**Standard** Mailboxes in accordance with DIN EN 13724

### Support posts and equipment

**Support posts** Round tube approx. 60 mm made of brushed stainless steel V2A 1.4301
**Types of installation** Optionally for screw mounting or concreting-in
**Anchor bolts** Not included for screw mounting; select separately to suit the foundation
**Rain canopy / side panels** Galvanised steel, powder-coated in RAL 7016 Anthracite grey fine-textured matt

**25-litre mail volume**

The BASIC 385220 uses the deep mailbox design with approx. 300 × 220 × 385 mm and around 25 litres of volume per compartment. The additional volume is particularly suitable for regular mail, magazine and catalogue deliveries as well as longer collection intervals.

#### Mounting by concreting-in

For the freestanding mailbox system we recommend a sufficiently sized concrete foundation. The stainless-steel support posts must be aligned plumb and permanently anchored in the foundation. Foundation size and embedment depth should be matched to the ground conditions, system weight and local circumstances.

#### Screw mounting on a foundation

For screw mounting, a level and load-bearing concrete foundation is required. Appropriate anchor bolts or equivalent fixings must be selected to suit the substrate and system loads. Anchor bolts are not included in the basic scope of delivery.

#### Note on weather protection

Postal items are best protected from moisture and soiling when fully inserted and with the insertion flap closed. Protruding items can prevent the flap from closing completely. Under extreme weather conditions, moisture can enter the mailbox despite compliance with standards.

## Product properties

| | |
|---|---|
| **Material** | Steel, galvanised |
| **Series** | BASIC |
| **Number of boxes** | with 4 letterboxes |
| **Name labelling** | Nameplate |
| **Mounting type** | Free-standing |
| **Surface/colour** | RAL 7016 anthracite grey, Brushed |
| **Removal of mail** | On the front |
| **Boxes by volume** | Large > 16 litres |
