Designer wheelie-bin enclosure ARENDT for 4 wheelie bins – RAL 7016 Anthracite grey | 4-fold

Product number 351-4

Product description

ARENDT wheelie bin store for 4 wheelie bins – spacious solution for homes and properties

The ARENDT wheelie bin store for 4 wheelie bins provides four separate bays within a uniformly designed enclosure. It is particularly suitable for larger households, apartment buildings, residential developments and commercially used properties.

Each bin remains accessible via an individual front door and a dedicated top lid. This allows each bin to be filled independently and removed for collection.

Galvanised steel, a powder coating in RAL 7016 Anthracite grey and the linear construction ensure a calm, modern appearance even in the larger 4-unit version.

The advantages of the ARENDT wheelie bin store at a glance

Four wheelie bins in a single unit

Four waste containers are consolidated at a central location while remaining fully independently accessible.

Robust outdoor construction

The unit is made from galvanised steel with a material thickness of approx. 0.8 mm and provides a stable base for housing four wheelie bins.

Uniform in RAL 7016 Anthracite grey

The powder coating provides a uniform, modern surface across the entire unit and helps protect against typical weathering effects.

Four gas-strut assisted top lids

Each wheelie bin bay has its own top lid with a gas strut. This enables each container to be filled separately and conveniently from above.

Ideal for larger households and properties

Four separate bays provide sufficient capacity for multiple waste fractions and make the ARENDT 4-unit a suitable solution for larger private and commercial outdoor areas.

Equipment of the ARENDT wheelie bin store

Construction and finish

Version For 4 wheelie bins
Suitable wheelie bins 60 / 120 / 240 litres per bay
Material Galvanised steel
Material thickness approx. 0.8 mm
Finish RAL 7016 Anthracite grey, powder-coated

Operating convenience

Access 4 independently operable front doors
Filling 4 separate top lids
Lid support Gas struts with 80 N per lid unit
Ventilation Ventilation openings in the front doors
Use All four bays operable independently of one another

Installation and scope of delivery

Type of installation Freestanding installation with floor anchoring
Mounting materials Included in the scope of delivery
Instructions Assembly and operating instructions included
Application areas Apartment buildings, residential properties and commercial outdoor areas

Note on floor anchoring

The wheelie bin store must be installed on a level and sufficiently load-bearing surface. Fixings and anchoring should be chosen according to the existing substrate and, if necessary, adapted to local conditions.

Note on use

All four doors and top lids must be free and independently movable after installation. The connection of the top lids to the respective wheelie bin lids must be checked before use.
