DoorBird RFID transponder key fob 125 kHz – pack of 10

Product number 1298-TKEYF

Product description

DoorBird RFID Transponder Key Fob 125 kHz – 10 pieces

The DoorBird RFID Transponder Key Fob 125 kHz enables convenient, contactless access control for compatible DoorBird door stations and access control systems. The transponder is simply held in front of the integrated RFID reader and can – depending on the configuration of the DoorBird system – be used to open a front door, gate or another connected access point.

The set includes 10 weatherproof RFID key fobs made from robust ABS. Their compact design allows the transponders to be conveniently attached to a key ring and makes them suitable for private residential properties as well as multi-family dwellings, office buildings and commercial premises.

Contactless access control at 125 kHz

The DoorBird transponders operate at a frequency of 125 kHz and are equipped with a TK4100 chip. Each transponder has a unique identifier and is read-only. Access permissions are stored in the compatible DoorBird system, so individual transponders can be added or removed as required.

Ideal for multiple users

The set of 10 RFID transponders is particularly suitable for households, multi-family dwellings, businesses or other properties with multiple authorised users. Each user receives their own key fob, while permissions can be centrally managed via the respective DoorBird system.

Compact and weatherproof

The housing is made from weatherproof ABS and is designed for everyday use on a key ring. With dimensions of only 39.9 x 30.9 x 5.3 mm, the RFID transponders are compact and easy to carry.

Product	DoorBird RFID Transponder Key Fob 125 kHz
Quantity	10 pieces
Application	Contactless access control for compatible DoorBird door stations and access control systems
Technology	RFID transponder
Frequency	125 kHz
Chip	TK4100
Data	64 bit
Storage	Read-only
Standard protocol	18000-2
Data retention	Up to 10 years
Read range	Approx. 1 - 10 cm, depending on the reader used, the antenna and environmental conditions
Material	Weatherproof ABS
Colour	Grey
Dimensions	39.9 x 30.9 x 5.3 mm (H x W x D)
Operating conditions	-25 °C to +55 °C Relative humidity 10% to 85%, non-condensing
Compatibility	DoorBird A1121 IP access control system DoorBird IP video door stations of the D21x series DoorBird IP video door stations of the D22x series DoorBird IP video door stations of the D31x series
EAN	4260423860605
Manufacturer part number	423860605
Contents	10 x DoorBird RFID Transponder Key Fob 125 kHz

Benefits of the DoorBird RFID transponders

- Contactless access control via 125 kHz RFID.
- Practical 10-piece set for multiple users.
- TK4100 chip with unique 64-bit identifier.
- Read-only memory for reliable identification.
- Compact design for attachment to a key ring.
- Weatherproof ABS housing for everyday use.
- Compatible with various DoorBird door stations and access control systems.
- Suitable for detached houses, multi-family dwellings, office buildings and commercial properties.

Notes

- The transponders operate exclusively at 125 kHz and are not equivalent to a 13.56 MHz RFID transponder.
- The actual read range depends on the RFID reader used, the antenna and local conditions.
- Please check before ordering whether your DoorBird device supports 125 kHz RFID.
- Configuration and management of access permissions is carried out via the respective DoorBird system.
- In the event of loss, the corresponding transponder can be removed from access management so that its authorisation can no longer be used.
