# Freestanding mailbox STORM for 3 households – single-column – RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | with 3 mailboxes (1x3)

**Product number** 480STQ-3S-7016

## Product description

## Freestanding STORM mailbox system for 3 households – premium solution for narrow spaces

The STORM freestanding mailbox system for 3 households combines a clear, modern design with very high material and manufacturing quality. The three mailboxes are arranged one above the other to save space. This allows a high-quality multi-occupancy system to be realised even at narrower property entrances. The system is designed as a durable entrance solution for residential and commercial properties and is manufactured at the Briefkasten Manufaktur in Germany.

The mailboxes, canopy and side panels are made of **high-quality galvanised steel** and are **powder-coated in RAL 7016 Anthracite grey, fine-textured matt**. The **40 × 40 mm support posts in stainless steel V2A 1.4301, brushed** deliberately form a high-quality material contrast. In particular, the combination of the fine-textured anthracite-grey surface and brushed stainless steel defines the quality character of the STORM series.

Each mailbox has an insertion slot measuring 35 × 340 mm for DIN C4 mail in landscape format. Noise-dampening rubber buffers, a front-facing downward-opening collection door with opening stop, a mail-retaining bar and two keys with key number per mailbox ensure comfortable use. The mailboxes are manufactured in accordance with DIN EN 13724.

## The advantages of the STORM freestanding mailbox system at a glance

### Ideal for smaller apartment buildings

Three separate mailboxes, a premium material combination and German quality manufacturing make this STORM system a convincing solution for smaller apartment buildings with three households. The DIN EN 13724-compliant mailboxes provide each unit with a fully functional mailbox.

### Very high material quality of the mailboxes

All 3 mailboxes as well as the canopy and side panels are produced from galvanised steel. The powder coating in RAL 7016 Anthracite grey, fine-textured matt creates a high-quality, homogeneous surface and emphasises the system's clean-lined architecture.

### Premium support posts in brushed stainless steel

The 40 × 40 mm support posts are made from stainless steel V2A 1.4301 and have a brushed finish. The high-quality stainless steel forms the robust base of the system and provides a deliberately elegant contrast to the anthracite-grey mailbox surface.

### DIN C4 insertion and comfortable mail retrieval

All mailboxes feature a 35 × 340 mm insertion slot suitable for DIN C4 envelopes in landscape format. Rubber buffers reduce impact noise; opening stop and mail-retaining bar support comfortable retrieval.

### Freestanding and flexible to plan

Due to the tall, narrow design, careful and permanently secure anchoring in the foundation is particularly important. For screw mounting, suitable anchor bolts must be selected separately to match the foundation and local installation conditions.

## Equipment and high-quality materials

### Mailbox and surface

**Number of mailboxes** 3 separately lockable mailboxes
**Arrangement** 1 column × 3 rows
**Material of mailboxes** Steel, galvanised
**Surface of mailboxes** RAL 7016 Anthracite grey, fine-textured matt, powder-coated
**Canopy and side panels** Galvanised steel, RAL 7016 Anthracite grey, fine-textured matt
**Standard** Mailboxes in accordance with DIN EN 13724

### Mail convenience

**Insertion slot** 35 × 340 mm per mailbox, suitable for DIN C4 in landscape format
**Insertion flaps** With high-quality, noise-dampening rubber buffers
**Mail retrieval** Front-facing, downward-opening door with opening stop
**Mail-retaining bar** Integrated in each mailbox
**Keys** 6 keys in total, 2 per mailbox, with key number
**Nameplates** 3 protected interchangeable nameplates under the insertion flaps

### Support posts and mounting

**Material of support posts** Stainless steel V2A 1.4301
**Cross-section** 40 × 40 mm
**Surface of support posts** Brushed stainless steel
**Types of mounting** Optionally for embedding in concrete or for screw mounting
**Anchor bolts** Not included for screw mounting; to be selected separately to suit the foundation

**Manufacture** Made in Germany by Briefkasten Manufaktur Lippe

#### Mounting by embedding in concrete

The stainless steel support posts must be anchored plumb in a sufficiently dimensioned foundation. Foundation size and design must be matched to the ground conditions, the weight of the unit and local loads.

#### Screw mounting on a foundation

A flat, load-bearing foundation is required for screw mounting. The required anchor bolts are not included and must be selected separately to suit the existing foundation design.

#### Note on weather protection

For optimal protection, mail items must be fully inserted so that the insertion flaps can close completely. A sheltered location additionally reduces direct exposure to the weather.

## Product properties

| | |
|---|---|
| **Material** | Steel, galvanised |
| **Series** | STORM |
| **Boxes by volume** | Normal > 10 litres |
| **Mounting type** | Free-standing |
| **House number** | House number as laser engraving |
| **Surface/colour** | RAL 7016 anthracite grey |
| **Name labelling** | Laser-engraved |
| **Removal of mail** | On the front |
| **Number of boxes** | with 3 letterboxes |
