2 x Ultra flush-mounted video door station incl. 1210A power supply unit & 2x LS8741 Wifi home station - complete set - RAL of your choice

Product number 1299-KSUT2020-2

Product description

2-gang video door station Ultra UP incl. power supply unit 1210A & 2x home station LS8741 Wifi - complete set - RAL of your choice

This modern COMELIT video door intercom system with LS8741 home station combines innovative technology, the highest security standards and ease of use in a powerful complete system. Ideal for conversions or renovations, this set is ideal for replacing existing systems - without any time-consuming cable laying, plastering or painting work. Thanks to the sophisticated 2-wire technology, the door station can be easily integrated into existing structures - simply connect two wires and get started.

The outdoor station included in the set is supplied in a high-quality die-cast aluminium frame for flush-mounted installation and is available in a RAL or DB colour of your choice - perfectly matched to the design of your letterbox system or façade. The integrated wide-angle camera with a detection range of 120° horizontally and 90° vertically ensures razor-sharp images day and night. The intelligent LED lighting including twilight sensor illuminates the camera and buttons only when required, saving energy. An omnidirectional digital microphone and two high-quality speakers ensure excellent audio quality, enabling clear communication in hi-fi quality - even in difficult ambient conditions. Barrier-free functions such as visual and acoustic signals for people with disabilities can be individually programmed and offer additional convenience and safety for all users. The robust design fulfils the requirements of protection classes IP65 (dust and water jet-proof) and IK08 (impact-resistant) - ideal for outdoor use in all weather conditions.

Inside, the LS8741 home station impresses with its modern design and intuitive user interface. The system can be conveniently connected to the free COMELIT app via the integrated WiFi function. This not only allows you to receive video calls from the door station directly to your smartphone - no matter where you are - but also gives you access to live images from the cameras, stored video messages and allows you to open doors or gates remotely. Other smart functions such as facial recognition and voice control via Amazon Alexa set new standards in intelligent home communication. Open your door without a key or app - just by looking at it. Integration is simple and requires no specialist knowledge.

Data protection & security - Made in Europe: COMELIT not only stands for quality and design, but also for uncompromising data security. As a private Italian company with no state involvement, COMELIT fulfils all GDPR and NDAA requirements. The entire cloud infrastructure is located in Frankfurt and is operated in collaboration with Amazon Web Services (AWS) - for maximum reliability and control over your data.

- Door station with audio/video unit and double button for 2 parties in RAL/DB colour of your choice.
- 2-wire system, simply plug in 2 wires and get started.
- Wide-angle camera (2-wire: H120° x V90° field of view) with high resolution.
