Socket and power column ORDO for freestanding installation - CEE - Schuko - 811 mm - 12-socket - 2-column - RAL 9007 grey aluminium | RAL 9007 grey aluminium, fine-structure matt | 12-unit, 2-column

Product number 376-12-2-9007

Product description

Modular socket column ORDO 12-way, two-column, 811 mm – RAL 9007 Grey aluminium

The modular socket column **ORDO** with twelve module slots was developed for extensive and versatile outdoor power supply requirements. The **two-column version** with an overall height of **811 mm** offers ample space for a clear arrangement of numerous sockets, switches and functional modules.

The power column is particularly suitable for larger residential complexes, commercial properties, workshops, company premises and publicly used outdoor areas. By dividing the modules into two columns, different supply areas can be clearly separated or various functions compactly combined in a single column.

The socket column is manufactured from **galvanised steel** and powder-coated in **RAL 9007 Grey aluminium, fine-textured matt**. The modern metallic tone blends harmoniously with contemporary architecture and technically styled outdoor areas. Two integrated rain canopies additionally reduce the direct impact of precipitation on the modules below.

- Two-column socket column with a total of twelve module slots.
- Overall height of 811 mm.
- Suitable for extensive and versatile module configurations.
- Manufactured from galvanised steel.
- Powder-coated in RAL 9007 Grey aluminium, fine-textured matt.
- Integrated rain canopies for protection against the weather.
- Modular design for individual configuration, adaptation and expansion.
- Can be fitted, for example, with CEE or Schuko sockets and prepared modules for your own switch ranges.
- Further fittings such as switches, push buttons, key switches, communication ports, industrial sockets, motion detectors, lighting or water connections are available on request.
- Rear-protected socket modules with high-quality plastic housings.
- Thought-through installation: secure the column to the floor, wire it, slide in the front panels and fasten with screws.
- German quality manufacture at Briefkasten Manufaktur.

Important information

The installation, electrical connection and testing of the sockets and components used must be carried out by a qualified electrician.

Note for camping, caravan and motorhome pitches

This version has more than four module slots and is not intended as a power supply for camping, caravan or motorhome pitches. Special requirements apply in these application areas regarding socket type, protection (fusing), residual-current protection and maximum grouping.

The specific planning, installation and testing must be carried out by a qualified electrician in accordance with the national regulations applicable at the place of use. In Germany, the relevant DIN VDE standards must, in particular, be observed.

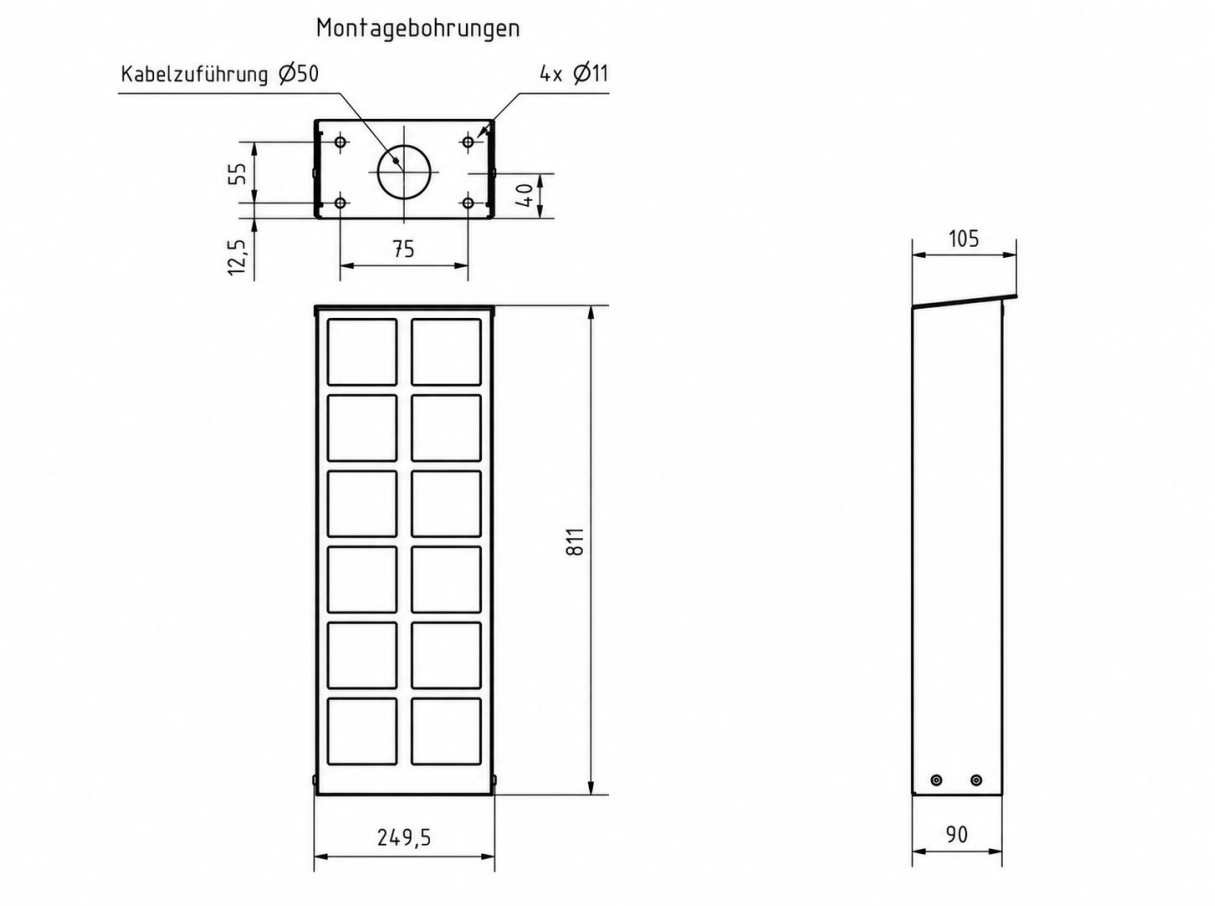

Product properties

Material	Steel, galvanised, Stainless steel V2A 1.4301
Series	ORDO
Mounting type	Free-standing
Surface/colour	RAL 9007 grey aluminium

Dimensions

Width in mm	249.5
Height in mm	811
Total width in mm	249.5
Depth in mm	90 | 105
Weight in kg	10
Delivery condition	Delivered fully assembled.
