Cover rosette for round tube Ø 60.3 mm

Product number SP500400-60

Product description

To provide a neat covering of the fixings and the transition to the ground, we recommend our cover rosettes made of brushed stainless steel V2A. They also protect the base plates from weather and external influences.

Important note: The cover rosettes must be selected during the configuration of the mailbox system, as they are factory-fitted. For systems designed for screw mounting, subsequent installation is not possible due to the construction – not even prior to installing the mailbox system.
