Freestanding 2-unit mailbox system Design BASIC 385-9016 ST-R - RAL 9016 traffic white | RAL 9016 Traffic White, fine-textured matt | 300x110x385 mm (WxHxD) - ?? Normal 12 litres | with 2 letterboxes (1x2)

Product number 385-9016-2S

Product description

Freestanding 2-unit mailbox system BASIC 385 for 2 households – narrow, vertically oriented design – RAL 9016 Traffic White

With 2 separately usable mail compartments, the freestanding BASIC 385 offers a clear mail solution for semi-detached houses, houses with a secondary flat and smaller commercial properties. The stand-mounted installation allows flexible positioning where the system is easily accessible for residents and postal carriers.

The S variant is vertically oriented and uses the available system width particularly efficiently – ideal for narrower property entrances.

The mailboxes are made of galvanised steel and receive a powder coating in RAL 9016 Traffic White fine-textured matt. A close-fitting side cladding with rain canopy unites the individual mailboxes into a closed overall system.

Each compartment has an insertion aperture of 35 × 265 mm for DIN-C4 items in portrait format. A noise-dampening rubber lip reduces impact noise, while the front access doors open from left to right. Each mailbox comes with two keys with key number and a changeable nameplate located beneath the mail flap.

The advantages of the BASIC 385 at a glance

Robust stainless steel stand posts

Round-tube stand posts with approx. 60 mm diameter made of brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for long-term use at the property entrance.

Large mail slot according to DIN EN 13724

The insertion aperture of 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can also be inserted without bending.

Quiet insertion and convenient retrieval

A noise-dampening rubber lip reduces the mail flap impact. Mail is retrieved from the front via doors that open from left to right.

Bright finish in RAL 9016

RAL 9016 Traffic White fine-textured matt provides a clear, bright appearance and protects the galvanised steel construction durably.

Proven BASIC quality Made in Germany

The combination of solid material selection, DIN EN 13724-compliant mail compartments and an installation-friendly construction makes the BASIC 385 a durable solution for daily use.

Equipment of the BASIC 385 mailbox system

Mailbox system

Design Narrow, vertically oriented design
Number of mailboxes 2 separately usable mail compartments
Mailbox material Galvanised steel
Finish RAL 9016 Traffic White fine-textured matt
Rain canopy / side cladding Galvanised steel, powder-coated in RAL 9016 Traffic White fine-textured matt
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Insertion aperture 35 × 265 mm, suitable for DIN C4 portrait
Mail flaps With noise-dampening rubber lip
Mail retrieval From the front
Door opening Opens from left to right
Keys 2 keys with key number per mailbox
Nameplate Changeable nameplate beneath the mail flap
Standard Mailboxes conforming to DIN EN 13724

Stand posts and fittings

Stand posts Round tube approx. 60 mm made of brushed stainless steel V2A 1.4301
Installation methods Optional for screw mounting or for embedding in concrete
Fixings Anchor bolts for screw mounting not included; select suitable fixings for the foundation separately

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on product configuration. The standard version 300 × 110 × 385 mm offers approx. 12 litres of volume; depending on the variant, 300 × 220 × 385 mm with approx. 25 litres of volume is also available.

Mounting by embedding in concrete

For the freestanding system we recommend a sufficiently dimensioned concrete foundation. When embedding, the stainless steel stand posts must be set plumb and permanently anchored in the foundation. Foundation size and embedment depth must be matched to soil conditions, system weight and local circumstances.

Screw mounting on a foundation

A flat, load-bearing concrete foundation is required for screw mounting. Suitable anchor bolts or fixings should be chosen according to the substrate and system loads. For the BASIC-385-ST-R variants, anchor bolts are not included in the standard scope of delivery.

Note on weather protection

Mail items are best protected from moisture and soiling only when fully inserted and with the mail flap closed. Oversized items may prevent the flap from closing completely. In extreme weather conditions, moisture may enter the mailbox despite conformity with standards.

Product properties

Material	Steel, galvanised, Stainless steel V2A 1.4301
Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), Brushed, RAL 9007 grey aluminium, RAL 9016 traffic white
Series	BASIC
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Number of boxes	with 2 letterboxes
Removal of mail	On the front
