Product number 562-UP-SPR-1-VA-GI106KS

Product description

Design Mailbox GRIMM® – A Masterpiece of Mailbox Manufacturing

The design flush-mounted mailbox GRIMM combines modern design with exceptional craftsmanship – ideal for discerning builders and architects seeking an elegant solution for the integration of the Gira System 106. Manufactured from high-quality stainless steel and fully “Made in Germany” by the Lippe Mailbox Manufacturing Company, this model stands for durability, functionality, and stylish aesthetics. The brushed front panel made of 2 mm stainless steel V2A (1.4301) impresses with its timeless appearance and high corrosion resistance. The flush design allows for seamless integration of up to three GIRA 106 system modules via a thoughtfully designed support system. Three GIRA system modules are included, allowing the mailbox to be used directly. The appropriate GIRA apartment station and control unit are included to complete this mailbox. The modules can be easily exchanged later thanks to the simple support system.

The mailbox GRIMM® is not only an optical highlight, but also leads the way in functionality and quality. Thanks to the innovative push-key lock, the mailbox can be easily and comfortably operated with one hand. Open the door with a push and close it without using a key. The lock is optimally protected against weather influences. Additionally, the mailbox features an intelligent retrieval system: The door opens from top to bottom, ensuring that the mail stays securely in the box and does not fall out. Mail can also be comfortably inserted from the front, with high-quality axle dampers allowing for a soft closing of the drop flap. Unique to the GRIMM is the double-box system: The mounting box can be installed during the shell construction phase, while the front panel is mounted only after the construction work is completed – providing maximum flexibility for the future and protection against dirt and dust during the construction phase. The insertion box is made from stainless steel 1.4016 and features pre-punched cable entries on all sides to enable easy electrical installation.

Thanks to the DIN/EN 13724 standard, the GRIMM is ideally suited for large letters in C4 format, which can be inserted without bending. The mailbox GRIMM® impresses with its durable quality, timeless design, and thoughtful functionality.

- High-quality mailbox entirely made of stainless steel for flush mounting.
- Front panel made of 2 mm stainless steel V2A 1.4301, brushed.
- Quality manufacturing – Made in Germany by Lippe Mailbox Manufacturing Company.
- Including GIRA apartment station & control unit, system 106 door station module, info module & camera module installed.
- Innovative push-key lock including 2 keys with key numbers, pleasant locking without a key, optimally protected from the weather.
- The retrieval door with opening limiter opens from top to bottom to prevent mail from falling out.
- Front-side insertion with high-quality axle dampers for very quiet insertion of the mail.
- DIN/EN 13724 compliant mailbox, insertion size (3.5 cm x 32.5 cm) for C4 landscape – even large letters remain undamaged. Additional retrieval protection made of stainless steel integrated.
- Optimal weather protection provided by the recessed panel.
- Double-box system: Ideal for flush mounting. The panel can be comfortably installed after construction work is completed.
- Insertion box made of stainless steel 1.4016 (non-rusting, magnetic stainless steel) with pre-punched cable entries on all sides.

GIRA

Camera Module Gira System 106 - 5561 000

- Behind the exchangeable black glass panel hides a high-quality camera with high light sensitivity. Thanks to a detection angle of 100°, the user is always informed about what is happening in front of their door.

Info Module Gira System 106 - 5560 920

- For house numbers that should be prominently displayed.

Door Station Module Gira System 106 - 5565 920

- Compact speech module with integrated call button for communication between inside and outside.
- A high-quality microphone and weatherproof loudspeaker ensure good communication.
- Power supply via 2-wire bus. Additional connection for ZV (e.g., required from 3. camera module).
- All other System 106 modules (except speech module) are powered via the door station module.

Apartment Station Gira Video AP 7 1209xx

- Video apartment station with a 17.78 cm (7") TFT colour display and comfortable hands-free function for surface-mounted or wall-mounted installation with flush-mounted device box or hollow wall box. With the optional stand (see accessories), also suitable for placement on furniture. A 32 GB SD memory card is included for internal image storage. Full glass front with touch functionality and tactile feedback.

Control Unit Video REG Gira 128800

- Control unit for supplying the audio and video components of the Gira door communication bus.
- Power supply for the polarity-proof and short-circuit-proof 2-wire bus when using video components such as colour camera, TFT colour display.
- Up to 2 door stations with colour camera and 28 apartment stations with TFT colour display can be powered via the video control unit.
- In total, up to 15 colour cameras can be operated by the video control unit (5 video door stations and 10 TKS camera gateways), of which two door stations with colour camera can be powered by the video control unit. The other colour cameras must be powered by their own power supply for door communication.
- Self-resetting electronic short circuit and overload detection of the operating voltages and bus connection.
- Buttons for system and door opener programming.
- LED status indicators for operation, overload, system programming, and door opener programming.
- AC 12 V output for supplying a commercially available door opener.
- Relay output for activating a door opener with its own power supply.
- Door opener activating time infinitely adjustable from 1 to 10 seconds.

Important Information:

To achieve optimal water protection for your mail, the mailbox or mailbox system should ideally be positioned under a canopy.

Mail is only protected from water if it is completely placed in the box and the drop flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the mailbox. This system is protected against water ingress according to DIN EN 13724. Water entry is not a valid reason for complaint.

Product properties

Series	GRIMM
Connection technology	2-wire
Number of bell push buttons	1 Taster
Functions	Camera, Intercom
Functional box prepared for manufacturer	GIRA
Material	Stainless steel V2A 1.4301, Stainless steel 1.4016 (non-rusting magnetic stainless steel)
House number	House number as laser engraving
Name labelling	Laser-engraved
Removal of mail	On the front
Number of boxes	with 1 letterbox
Surface/colour	Brushed
Boxes by volume	Large > 16 litres
Mounting type	Flush-mounted
