7-unit stainless-steel freestanding letterbox Design BASIC Plus 385 XP SP with doorbell box - RAL colour of your choice | Right | ? Colour of your choice | with 7 mailboxes

Product number 385XP-7-SP-R

Product description

Freestanding mailbox system BASIC Plus 385XP ST-T with bell/intercom unit for 7 households – bell unit on the right

The freestanding BASIC Plus 385XP ST-T mailbox system for 7 households combines robust stainless-steel mailboxes with an integrated bell/intercom unit. Mailbox system and visitor communication are thus brought together in a stable, visually cohesive entrance solution for larger apartment buildings, residential complexes and commercial properties. In this version, the bell/intercom unit is positioned on the right.

The mailboxes are made of stainless steel V2A and are high-quality powder-coated in a RAL colour of choice. Particularly noteworthy are the solid stand elements made from anodised aluminium profile: these are also powder-coated, exceptionally robust and form an unusually sturdy base for the entire mailbox system. Stainless steel and solid aluminium combine durability with a clear, high-quality architectural appearance.

Each compartment measures 300 × 110 × 385 mm (W × H × D) and offers approx. 12 litres of volume. The 35 × 265 mm mail slot is designed for DIN C4 items in portrait format. A noise-damping rubber lip on the flap, front access for mail retrieval, a robust lock and a changeable nameplate ensure comfortable use in everyday life.

The advantages of the BASIC Plus 385XP ST-T system at a glance

Mailbox and bell combined in one system

7 mail compartments are combined with a bell/intercom unit. This reduces additional individual components at the property entrance and provides a tidy overall appearance.

Solid aluminium stand elements

Solidly manufactured, anodised aluminium profiles form the particularly robust base of the system. The powder-coated profile construction is designed for high stability and long-term outdoor use.

DIN C4 insertion with 12-litre volume

The 300 × 110 × 385 mm mailboxes each provide approx. 12 litres of mail volume. The 35 × 265 mm insertion slot accepts DIN C4 mail in portrait orientation.

Bell/intercom unit prepared

The integrated bell/intercom unit provides a central location for bell buttons and the integration of compatible intercom technology. The electrical components are executed to match the planned system.

BASIC Plus – built for heavy duty

The consistent combination of stainless steel V2A and solid aluminium profiles makes the 385XP a particularly robust mailbox system. The modular construction simplifies installation, maintenance and the later replacement of individual components.

Equipment of the BASIC Plus 385XP ST-T mailbox system

Mailbox system

Number of mailboxes 7 separately lockable compartments
Single compartment 300 × 110 × 385 mm (W × H × D)
Mail volume Approx. 12 litres per mailbox
Mailbox material Stainless steel V2A, powder-coated in a RAL colour of choice
Insertion slot 35 × 265 mm, suitable for DIN C4 portrait
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and additional functions

Bell/intercom unit Integrated into the mailbox system
Position Right
Doorbell buttons Appropriate to the number of households
Intercom system Preparation for a compatible door communication system
Electrical connection To be provided on site according to the chosen intercom system
Note Intercom system and connection components depend on the selected configuration

Solid aluminium stand elements

Stand elements Solid anodised aluminium profile, powder-coated
Construction Designed to be particularly robust and load-bearing
Surface RAL colour matching the mailbox system
Installation Freestanding installation on a suitable foundation
Side cladding Close-fitting design
BASIC Plus Modular, maintenance-friendly and designed for installation

Note regarding the bell/intercom unit

The specific intercom technology, power supply and cabling depend on the chosen door communication solution. Installation and connection should be carried out by appropriately qualified personnel.

Foundation and secure installation

The solid aluminium stand elements require a level and sufficiently load-bearing subsoil or a suitably dimensioned concrete foundation. Foundation size, fixings and alignment must be matched to the system weight, size, ground conditions and local loads.

Note on weather protection

Canopy, close-fitting side cladding and rain drainage channels support weather protection. Mail items must be fully inserted so that the insertion flaps can close completely.

BASIC Plus – robust and modular

The BASIC Plus construction relies on stainless steel V2A and solid aluminium profiles. The modular design simplifies installation and the later replacement of individual components and is engineered for a long service life.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	BASIC
Number of bell push buttons	7 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Material	Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Mounting type	Free-standing
Number of boxes	with 7 letterboxes
Removal of mail	On the front
