6-unit freestanding mailbox Design BASIC 385-7016 ST-R with bell box - horizontal - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | Right | with 6 letterboxes

Product number 385-7016-6W-SP-R

Product description

Freestanding 6-unit mailbox system BASIC 385 for 6 households – wide, multi-column configuration with bell/intercom unit – bell panel right – RAL 7016 Anthracite grey

For multi-family houses, smaller residential complexes as well as office and medical practice properties, the freestanding BASIC 385 as a system for 6 households offers a durable and clear entrance solution. The independent freestanding installation allows the mailbox system to be positioned to suit the plot and access situation.

The W configuration distributes the mail compartments in a wider, multi-column system layout and creates a clear façade for multiple users.

The mailboxes are made of galvanised steel and are powder-coated in RAL 7016 Anthracite grey, fine-textured matt. A close-fitting side cladding with rain canopy integrates the individual mailboxes into a closed overall system.

Each compartment features a letter slot of 35 × 265 mm for DIN C4 items in portrait format. A noise-dampening rubber lip reduces impact noise, while the front-access doors open from left to right. Each mailbox is supplied with two keys with key number and a removable nameplate below the letter flap.

The integrated bell/intercom unit on the right combines doorbell function and preparation for an intercom system directly in the mailbox system.

The advantages of the BASIC 385 at a glance

Solid stainless-steel support posts

Circular-tube support posts with approx. 60 mm diameter in brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for long-term use at the property entrance.

Large letter slot to DIN EN 13724

The letter slot measuring 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can also be inserted without folding.

Quiet posting and convenient retrieval

A noise-dampening rubber lip reduces the impact of the letter flaps. Mail is retrieved from the front via doors that open from left to right.

Durable finish in RAL 7016

The matt fine-textured surface in Anthracite grey combines a modern appearance with a durable coating on the galvanised steel.

Doorbell/intercom unit integrated directly

The bell/intercom panel on the right is integrated directly into the mailbox system.

Equipment of the BASIC 385 mailbox system

Mailbox system

Design Wide, multi-column configuration
Number of mailboxes 6 individually usable mail compartments
Material of mailboxes Galvanised steel
Finish RAL 7016 Anthracite grey, fine-textured matt
Rain canopy / side cladding Galvanised steel, powder-coated in RAL 7016 Anthracite grey, fine-textured matt
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Letter slot 35 × 265 mm, suitable for DIN C4 portrait
Letter flaps With noise-dampening rubber lip
Mail retrieval Front access
Door opening From left to right
Keys 2 keys with key number per mailbox
Nameplate Replaceable nameplate below the letter flap
Standard Mailboxes compliant with DIN EN 13724

Support posts and equipment

Support posts Circular tube approx. 60 mm in stainless steel V2A 1.4301, brushed
Mounting options Optionally for bolted installation or for embedding in concrete
Fixings Anchor bolts for bolted installation not included; select appropriate fixings for the foundation separately
Doorbell/intercom unit Integrated functional panel, position: right
Intercom preparation Speech perforation with universal adapter for common built-in speakers
Doorbell push-buttons Round stainless-steel push-buttons matching the product design

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on product configuration. The standard version 300 × 110 × 385 mm offers approx. 12 litres volume; depending on the variant 300 × 220 × 385 mm with approx. 25 litres volume is also available.

Installation by embedding in concrete

For the freestanding system we recommend a suitably sized concrete foundation. When embedding, the stainless-steel support posts must be aligned plumb and permanently anchored in the foundation. Foundation size and embedment depth must be matched to ground conditions, system weight and local circumstances.

Bolt fixing to a foundation

For bolted installation a level and load-bearing concrete foundation is required. Suitable anchor bolts or fixing materials must be selected to suit the substrate and the system load. For the BASIC-385-ST-R variants anchor bolts are not part of the standard delivery scope.

Note on weather protection

Mail is best protected against moisture and soiling only when fully inserted and with the letter flap closed. Oversized items can prevent the flap from closing completely. Under extreme weather conditions, moisture may enter the mailbox despite compliant design.

Note on doorbell and intercom technology

The doorbell/intercom unit is prepared with speech perforation and a universal adapter for common built-in speakers. Intercom systems or built-in speakers are not included in the standard equipment. Planning, connection and commissioning of electrical components should be carried out by a qualified electrician.

Product properties

Material	Steel, galvanised, Stainless steel V2A 1.4301
Series	BASIC
Number of bell push buttons	6 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Number of boxes	with 6 letterboxes
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey
Removal of mail	On the front
