4-unit freestanding mailbox Design BASIC 385 ST-R with bell box - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | Top | with 4 mailboxes

Product number 385-7016-4-SP

Product description

Freestanding 4-compartment mailbox system BASIC 385 for 4 households with bell/intercom module – RAL 7016 Anthracite grey

The freestanding BASIC 385 mailbox system for 4 households combines a robust construction with a clear, functional design. It is suitable for multi-family houses, smaller residential complexes as well as office and medical practice buildings and can be positioned independently of the building façade at the property entrance, at a driveway or along the access path.

The system configuration is matched to the respective number of households and, together with a rain canopy and side cladding, forms a closed unit.

The mailboxes are made of galvanised steel and are powder-coated in RAL 7016 Anthracite grey with a fine-textured matt finish. A close-fitting side cladding with rain canopy unites the individual mailboxes into a single integrated system.

Each compartment has an insertion aperture of 35 × 265 mm for DIN C4 items in portrait format. A noise-dampening rubber lip reduces impact noise, while the front access doors open from left to right. Each mailbox includes two keys with key number and an interchangeable nameplate positioned beneath the mail slot.

The integrated bell/intercom module consolidates bell functionality and provision for an intercom directly within the mailbox system.

The advantages of the BASIC 385 at a glance

Solid stainless-steel support posts

Round-tube support posts of approx. 60 mm diameter in brushed stainless steel V2A 1.4301 provide a stable base for the freestanding mailbox system. The robust construction is designed for long-term use at the property entrance.

Large mail slot according to DIN EN 13724

The insertion aperture of 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can also be inserted without folding.

Quiet insertion and comfortable retrieval

A noise-dampening rubber lip reduces the slamming of the insertion flaps. Mail is retrieved from the front via doors that open from left to right.

Durable finish in RAL 7016

The matt fine-textured surface in Anthracite grey combines a modern appearance with a resilient coating on the galvanised steel.

Bell/intercom module directly integrated

The bell/intercom panel is integrated directly into the mailbox system.

Equipment of the BASIC 385 mailbox system

Mailbox system

Design Article-specific system configuration
Number of mailboxes 4 separately usable compartments
Mailbox material Galvanised steel
Finish RAL 7016 Anthracite grey fine-textured matt
Rain canopy / side cladding Galvanised steel, powder-coated in RAL 7016 Anthracite grey fine-textured matt
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Insertion aperture 35 × 265 mm, suitable for DIN C4 portrait
Insertion flaps With noise-dampening rubber lip
Mail retrieval Front access
Door opening From left to right
Keys 2 keys with key number per mailbox
Nameplate Interchangeable nameplate beneath the mail slot
Standard Mailboxes conforming to DIN EN 13724

Support posts and fittings

Support posts Round tube approx. 60 mm in stainless steel V2A 1.4301, brushed
Mounting options Optionally for screw mounting or for embedding in concrete
Fixings Anchor bolts for screw mounting not included; select appropriate fasteners separately for the foundation
Bell/intercom module Integrated functional panel
Intercom provision Speaker cut-out with universal adapter for common flush-mounted loudspeakers
Doorbell push-button Round stainless-steel doorbell push-buttons matching the product design

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on the product configuration. The standard version 300 × 110 × 385 mm provides approx. 12 litres of volume; depending on the variant 300 × 220 × 385 mm with approx. 25 litres of volume is also available.

Mounting by embedding in concrete

For the freestanding system we recommend a suitably dimensioned concrete foundation. When embedding, the stainless-steel support posts must be aligned plumb and permanently anchored in the foundation. Foundation size and embedding depth must be matched to ground conditions, system weight and local requirements.

Screw mounting on a foundation

For screw mounting a level, load-bearing concrete foundation is required. Appropriate anchor bolts or fasteners must be selected to suit the substrate and the loads on the system. For the BASIC-385-ST-R variants, anchor bolts are not included in the standard scope of delivery.

Note on weather protection

Mail is best protected from moisture and dirt when fully inserted and with the insertion flap closed. Protruding items may prevent the flap from closing completely. In extreme weather conditions, moisture can enter the mailbox despite norm-compliant design.

Note on bell and intercom technology

The bell/intercom module is prepared with a speaker cut-out and a universal adapter for common flush-mounted loudspeakers. Intercom systems or flush-mounted loudspeakers are not included in the standard equipment. Planning, connection and commissioning of electrical components should be carried out by a qualified electrician.

Product properties

Material	Steel, galvanised, Stainless steel V2A 1.4301
Series	BASIC
Number of bell push buttons	4 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Boxes by volume	Normal > 10 litres
Number of boxes	with 4 letterboxes
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey
Removal of mail	On the front
