

BASIC digital lock (opening via app or NFC)

Product number BMLZB-SLO-887-15

Product description

Innovative, retrofittable lock for letterboxes from the BASIC collection

The digital letterbox lock from the BASIC collection combines modern technology with maximum ease of use. Simply open your letterbox using the free app (iOS & Android) or contactless via the supplied NFC tag - without the need for a mechanical key.

Bluetooth technology ensures a secure and reliable connection between smartphone and lock. Alternatively, a quick touch of the NFC tag with your mobile phone is all it takes to open the letterbox in seconds - even without app navigation.

The lock is specially designed for retrofitting and can be integrated into existing letterboxes from the BASIC series in just a few simple steps - without any complex wiring or special tools.

Thanks to the integrated **LongLife battery**, maintenance-free operation is possible for **more than 5 years**. The app informs you in good time before a battery change is necessary.

Your benefits at a glance

- **Access via app or NFC** - convenient and keyless
- **Bluetooth technology** - secure, encrypted connection
- **Customised QR code** - for one-off lock registration
- **Simple retrofitting** - installed in just 5 steps
- **Battery-powered & wireless** - runs for over 5 years
- **Weatherproof & robust** - ideal for outdoor use
- **No more key management** - ideal for multi-party properties, offices and holiday homes
