Important information:

In order to achieve optimum water protection for your mail, the letterbox or letterbox system should be located under a canopy if possible. If you install this system completely free-standing, we recommend using a rain canopy. Tight-fitting self-adhesive rain cover enclosed.

The mail is only protected from moisture and dirt when it is fully inserted and the flap is closed. In certain extreme weather conditions, water may still enter (up to 1ccm according to DIN EN 13724). This is not a reason for complaint.
