## Product description

### Freestanding XXL parcel box GOETHE with 1 letterbox and GIRA System 106 - video intercom left - lock system - RAL of your choice

Parcel delivery has changed dramatically in recent years - today's customers expect more flexibility and security than ever before. With the **GOETHE parcel letterbox** from Briefkasten Manufaktur, you can rely on an optimum combination of innovative technology and outstanding design, manufactured from high-quality stainless steel and aluminium, powder-coated in the colour of your choice. The **GIRA System 106** is integrated, which is a particularly flexible and future-proof solution for your entrance door thanks to its modular design. Three GIRA system modules are already included in the scope of delivery so that the letterbox is ready for immediate use. The matching GIRA home station and the necessary control unit are also included to complete the system. Thanks to the simple mounting system, the modules can be replaced or extended at any time without great effort.

The **letterbox** (BH 400x400 mm) is made of stainless steel (non-rusting, magnetic stainless steel), powder-coated in a RAL colour of your choice. It is equipped with an innovative push-key lock that locks in the same way as the parcel box and is supplied with ten keys. Mail is inserted and removed from the front. The insertion flap is fitted with high-quality axle dampers, allowing the mail to be inserted particularly quietly. The letterbox complies with **DIN/EN 13724** with an insertion size of 3.5 x 36.0 cm - sufficient for C4 envelopes in landscape format without them being creased. The removal door opens downwards so that the mail cannot fall towards you. The dimensions of the letterbox allow a capacity of approx. 64 litres. The innovative push-key lock is discreetly concealed inside: simply insert the key - without turning it - and the door opens.

The spacious **parcel box** (BH 600x1200 mm) is also made of stainless steel, powder-coated in a RAL colour of your choice. It has a volume of 192 litres and enables the delivery of parcels up to a size of 555 x 375 x 305 mm (WD), which corresponds to DHL parcel size L. The parcel flap is damped and closes particularly quietly. Thanks to the specially developed delivery gate, your parcel is automatically transported into the secure removal box after insertion. The lock is immediately ready for further deliveries and remains isolated from the removal box - so your parcels are optimally protected at all times. Any delivery company (e.g. DHL, DPD, TNT, GLS, Hermes) can use the parcel letterbox. Depending on the placement, up to four size M DHL parcels can even fit inside.

Briefkasten Manufaktur attaches great importance to high-quality materials. Stainless steel ensures extremely high corrosion resistance and an elegant surface finish. Quality assurance begins with the selection of our raw material suppliers and only ends when the parcel letterbox reaches you in the required quality. Put your trust in the **GOETHE parcel letterbox** - a secure, flexible and stylish solution for your post and parcel deliveries. A product that combines traditional craftsmanship with state-of-the-art technology - Made in Germany by Briefkasten Manufaktur Lippe.

- High-quality parcel letterbox made of stainless steel and aluminium, powder-coated in the colour of your choice.
- Quality production - Made in Germany by Briefkasten Manufaktur Lippe.
- Letterbox (BH 400x400mm) made of stainless steel 1.4016 (non-rusting magnetic stainless steel), powder-coated in RAL colour of your choice with stainless steel laser inscription pictogram "BRIEF".

**GIRA** not found or type unknown

#### Camera module Gira System 106 - 5561 000

- A high-quality camera with high light sensitivity is concealed behind the replaceable black glass pane. Thanks to a detection angle of 100°, the user is always in the picture of what is happening outside his front door.

#### Info module Gira System 106 - 5560 920

- For house numbers that need to be clearly visible.

#### Door station module Gira System 106 - 5565 920

- Compact voice module with integrated call button for communication between inside and outside.
- A high-quality microphone and a weatherproof loudspeaker ensure good communication.
- Power supply via 2-wire bus. Additional connection for ZV (e.g. necessary from 3rd camera module).
- All other System 106 modules (except voice module) are supplied with power via the door station module.

#### Surface-mounted home station Gira Video 7 1209xx

- Video home station with a 17.78 cm (7") TFT colour display and convenient hands-free function for surface mounting or wall mounting with flush-mounted device box or cavity wall box. Also suitable for placement on furniture with the optional stand (see accessories). A 32 GB SD memory card is included for internal image storage. Full-surface glass front with touch functionality and tactile feedback.

#### Video REG control device Gira 128800

- Control device for supplying the audio and video components of the Gira door communication bus.
- Supply of the reverse-polarity protected and short-circuit-proof 2-wire bus when using video components such as colour camera, TFT colour display.
- Up to 2 door stations with colour camera and 28 home stations with TFT colour display can be supplied via the video control device.
- A total of up to 15 colour cameras can be controlled by the video control device (5 video door stations and 10 DCS camera gateways), of which two door stations with colour camera can be supplied with power by the video control device. The other colour cameras must each be operated with their own power supply for door communication.
- Self-resetting electronic short-circuit and overload detection of the operating voltages and the bus connection.
- Buttons for system and door opener programming.
- LED status indicators for operation, overload, system programming and door opener programming.
- AC 12 V output for supplying power to a standard electric strike.
- Relay output for switching an electric strike with its own power supply.
- Door opener switching time continuously adjustable from 1 to 10 s.

## Important information

### Water protection

To achieve optimum water protection for your mail, the letterbox or letterbox system should be located under a canopy if possible.

The mail is only protected from water if it is completely placed in the box and the flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the letterbox. This system is protected against the ingress of water in accordance with DIN EN 13724. Water ingress is not a reason for complaint.

## Product properties

<b>Surface/colour</b>	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
