

Name inscription as laser engraving in contrasting colour - Arial | Arial (recommended, good readability)

Product number BML-9511RAL-NS-1

Product description

This is a high-quality, absolutely UV/weather-resistant laser inscription in a light or dark font colour depending on the RAL colour tone as a contrast (e.g. the inscription is lasered darker for light colours and lighter for darker colours). A specific choice of colour for the lettering is not technically possible here.

Lettering height 8-25mm

The font height refers to the height of the characters. Individual characters may deviate from this due to the font. This is a typographical standard and does not constitute a defect.
