

COMELIT home station video 6741W with mobile function

Product number 1299-6741W

Product description

COMELIT home station 6741W with mobile function

Colour monitor with 4.3" screen 16/9, full-duplex hands-free function and touch-sensitive buttons. Allows the brightness and contrast to be adjusted and the strength of the audio signal and ringtone to be set. Several melodies are available to personalise the ringtone. Equipped as standard with buttons for door opener, for activating/deactivating the speech connection with corresponding LED indicators. Dimensions: 160 x 115 x 22 mm (WD)

This version of the is equipped with an integrated Wifi system. After installing the system and the free app for your smartphone (Apple iOS or Android), you can connect the two in just a few very simple steps. This also requires a one-off registration with the Comelit cloud. You can then access your indoor intercom from anywhere in the world. The image and sound are transmitted smoothly and in high quality. Both communication and opening the front door or gateway are possible via the app.

With the 6741W door station and the Comelit app, you can simulate your presence at home, no matter where you are. If a neighbour, postman or stranger rings the doorbell, you answer the door call with your smartphone or tablet and give the visitor at the door the feeling that you are at home, even if you convince them with an excuse that you cannot come to the door at the moment (we are bathing the children; I am expecting visitors and am changing my clothes; I have just got out of the shower...). When a door call is received, it is sent from the Mini WiFi 2-wire indoor intercom to the Comelit Cloud via the WiFi router and forwarded to the smartphone or tablet (a 3G / LTE data connection is required). Due to the unique 2-wire technology in combination with a WiFi monitor, the time delay for reception in the 3G network on the mobile device is only approx. 5 seconds. The mobile device opens the app even when it is closed: the push function makes this possible.

Important information

Camera or intercom preparation

The intercom systems must be connected by an electrician. Please contact your trusted electrician for planning, fitting and installation.

Product properties

Connection technology 2-wire
