

Stainless steel parcel pedestal with letterbox Designer BIG - DoorBird video intercom - RAL of your choice | Right

Product number 599BPK-VAR-KSDB2101E-R

Product description

Stainless steel parcel pedestal with letterbox Designer BIG - DoorBird video intercom - RAL colour of your choice

Modern stainless steel pillar made of 2 mm stainless steel V2A 1.4301, powder-coated in RAL colour of your choice. The pillar is fully welded, so no rivets or screws are visible. The letterbox module and the parcel box module are also inserted into the pillar with invisible screws. The letterbox and parcel box modules are also made of 2mm stainless steel V2A 1.4301, powder-coated in RAL colour and can be replaced with new modules even after many years. Integrated DoorBird IP Video Door Station D2100E or D1100E. The DoorBird IP Video Door Station D2100E or D1100E is the smart solution for your entrance door. The IP video door station can be operated as a stand-alone unit or integrated into an existing smart home platform. Existing, classic installations such as a door chime or an electric door and gate opener can also continue to be used with DoorBird and controlled via the app.

This is a real eye-catcher among letterboxes. Clean lines and no-frills design characterise the designer letterbox. Our products have a high quality, reliable functionality and their own identity. Made by Briefkasten Manufaktur. The DoorBird was not only invented and developed in Germany, but is still produced in Berlin today. At DoorBird, "Made in Germany" is not just a seal, but a philosophy that is lived and breathed. The IP video door stations are manufactured in the DoorBird factory to guarantee the highest quality, durability and customer satisfaction.

Parcel reception independent of the delivery person! Any parcel deliverer (e.g. DHL, UPS, DPD, TNT, GLS, Hermes, etc.) can use this parcel box.

- **Letterbox module made of 2 mm stainless steel V2A 1.4301, powder-coated in RAL colour of your choice**
- Front mail removal door 350 mm x 300 mm, opens from top to bottom. Incl. 2 keys with key number.
- Mail slot from the front, dimensions: W 35 cm x H 6.3 cm, C4 landscape. Very large letters fit in here without creasing. Attention, no removal protection!
- Throw-in flap with built-in damping elements, these allow the throw-in flap to close slowly and quietly.
- Optionally with house number, backlit in white incl. EVN LED power supply unit / transformer IP65 12V/DC 0.1-4W for LED illumination of the house number.
- **Parcel box module made of 2mm stainless steel V2A 1.4301, powder-coated in RAL colour of your choice**
- Parcel compartment volume: 130 litres, max. Parcel dimensions: 540 x 690 x 340 mm (WD). Ideal for large parcels, suitable for single use until the next emptying.
- Front parcel removal door 510 mm x 660 mm, opens from left to right. Incl. 5 keys with key number.
- The parcel removal door is fitted with high-quality stainless steel hinges for extremely long service life.
- Innovative parcel lock with snap-in catch.
- High-quality stainless steel laser labelling "PAKET".
- The letterbox and parcel box modules of this pedestal can also be replaced at a later date, so you always remain flexible.
- **The fully welded pedestal is made of 2 mm stainless steel V2A 1.4301, powder-coated in RAL colour**
- Overall height is 1.70 m.
- Invisible cable feed through the body is possible.
- The pedestal is fitted with a VA base plate. This is 10 mm thick and is finished with a cover plate. This conceals the fixing plugs.
- Incl. DoorBird IP video door station D2100E or D1100E installed.

Important information

Camera or intercom preparation

The intercom systems must be connected by an electrician. Please contact your trusted electrician for planning, fitting and installation.

Water protection

To achieve optimum water protection for your mail, the letterbox or letterbox system should be located under a canopy if possible. If you install this system completely free-standing, we recommend using a rain canopy. Tight-fitting self-adhesive rain cover enclosed.

The mail is only protected from water if it is fully inserted in the box and the flap is closed. Mail that is not fully inserted allows moisture and dirt to penetrate the letterbox. It is therefore necessary to plan sufficiently dimensioned letterboxes for the upcoming requirements. Under certain extreme weather conditions, water can still enter (up to 1ccm according to DIN EN 13724). This is not a reason for complaint.

Product properties
