

# Through-the-wall letterbox BASIC 622 powder-coated in RAL 9016 traffic white - 4 parties

**Product number** 999OU-038

## Product description

### Through-the-wall letterbox BASIC 622 powder-coated in RAL 9016 traffic white - 4 parties

The through-the-wall letterbox has plenty of volume for receiving post and is variable in depth from 290 - 440 mm to optimally adapt to your wall thickness (30 degree angle running diagonally to the rear). Each individual letterbox has a size of 300 x 110 x 290 to 440 mm (WxHxD). The boxes comply with the current EN 13724 standard so that A4 envelopes, for example, can be inserted without being bent and protection against break-ins is guaranteed.

The major advantage of a wall letterbox system is that it is well protected from the weather and therefore very durable. Also well suited for installation in wall pillars. A quality product made in Germany.

- 4-panel through-the-wall letterbox system made of galvanised sheet steel, powder-coated.
- German quality production "Made in Germany".
- Inclined, pull-out box and front panel without end frame (for an even look without interruptions).
- Variable depth from 290mm - 440mm, 30 degree angle running diagonally to the rear.
- The letterbox complies with DIN/EN 13724. Insertion size (3.5 cm x 26.5 cm) for C4 high, large letters also fit in here without creasing.
- Insertion flaps with sound-absorbing rubber seal for very quiet insertion of mail.
- The removal door can be opened from left to right.
- Incl. 2 keys with key number & changeable name plate under the flap.
- The labelling on the name plates can be changed as required
- Assembly instructions included.
