

Design flush-mounted letterbox GRIMM - polished stainless steel with COMELIT Ultra - VIDEO set | Comelit Ultra | Top | Stainless steel, ground | Flush-mounted

Product number 562-UP-SPO-1-VA-CSU

Product description

Design flush-mounted letterbox GRIMM with Comelit video door intercom - modern technology meets timeless design

The GRIMM designer flush-mounted letterbox combines modern design, precise workmanship and high-quality materials - ideal for building owners and architects who are looking for an elegant and durable solution for integrating a Comelit video door intercom system. Made from robust stainless steel and completely "Made in Germany" by the letterbox manufacturer Lippe, this model stands for quality, functionality and clear, modern lines. The polished front panel made of 2 mm V2A stainless steel impresses with its high corrosion resistance and elegant, timeless appearance.

At the centre of this system is the **Comelit Ultra video door intercom**, available in two modern connection variants - **2-wire technology** and **ViP (IP technology)**. Both systems offer maximum flexibility, simple installation and future-proof network integration. The Comelit Ultra enables live video transmission, intercom function and mobile control via the **Comelit app**. This means you can see and speak to visitors at your front door at any time - whether you are at home or on the move - and open the door or gate if you wish. This makes door communication convenient, secure and smart.

The **GRIMM® letterbox** is not only an aesthetic highlight, but also impresses in terms of functionality and ease of use. The innovative **push-key lock** enables simple, one-handed operation: the door opens with a push and can be locked without a key - conveniently and protected from the weather. The **post removal door** at the front opens from top to bottom so that the post remains securely in the box and cannot fall out. The **front opening** is rounded off by high-quality axle dampers, which ensure that the flap closes particularly quietly and gently.

The GRIMM is particularly unique thanks to its double box system: the installation box can be installed during the shell construction phase, while the front panel is only fitted once the construction work has been completed - for maximum flexibility in the future and protection from dirt and dust during the construction phase. The plaster box is made of stainless steel and has pre-punched cable inlets on all sides to allow easy electrical installation.

Thanks to **DIN/EN 13724**, the GRIMM is suitable for large letters in C4 format, which can be inserted without creasing. The GRIMM letterbox therefore combines durable quality, modern technology and sophisticated functionality in one product.

- High-quality letterbox made entirely of stainless steel for surface mounting.
- Front panel made of 2 mm stainless steel V2A 1.4301, polished.
- Quality production - Made in Germany by Briefkasten Manufaktur Lippe.
- Integrated Comelit Ultra in two modern connection variants - 2-wire technology and ViP (IP technology). Both systems impress with their high flexibility, simple installation and future-proof network integration.
- Innovative push-key lock including 2 keys with key number, convenient locking without a key, optimally protected from the weather.
- The removal door with opening limiter opens from top to bottom to prevent mail from falling towards you.
- Front mail slot with high-quality axle dampers for very quiet mail insertion.
- DIN/EN 13724-compliant letterbox, insertion size (3.5 cm x 32.5 cm) for C4 landscape - even large letters remain intact. Additional stainless steel removal protection integrated.
- Optimum weather protection thanks to offset cover.
- Double box system: Ideal for flush mounting. The cover can be easily installed once the construction work is complete.
- Flush-mounted box made of stainless steel ##### (stainless, magnetic stainless steel) with pre-punched cable inlets on all sides.

Important information:

To achieve optimum water protection for your mail, the letterbox or letterbox system should be located under a canopy if possible.

The mail is only protected from water if it is completely placed in the box and the flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the letterbox. This system is protected against the ingress of water in accordance with DIN EN 13724. Water ingress is not a reason for complaint.

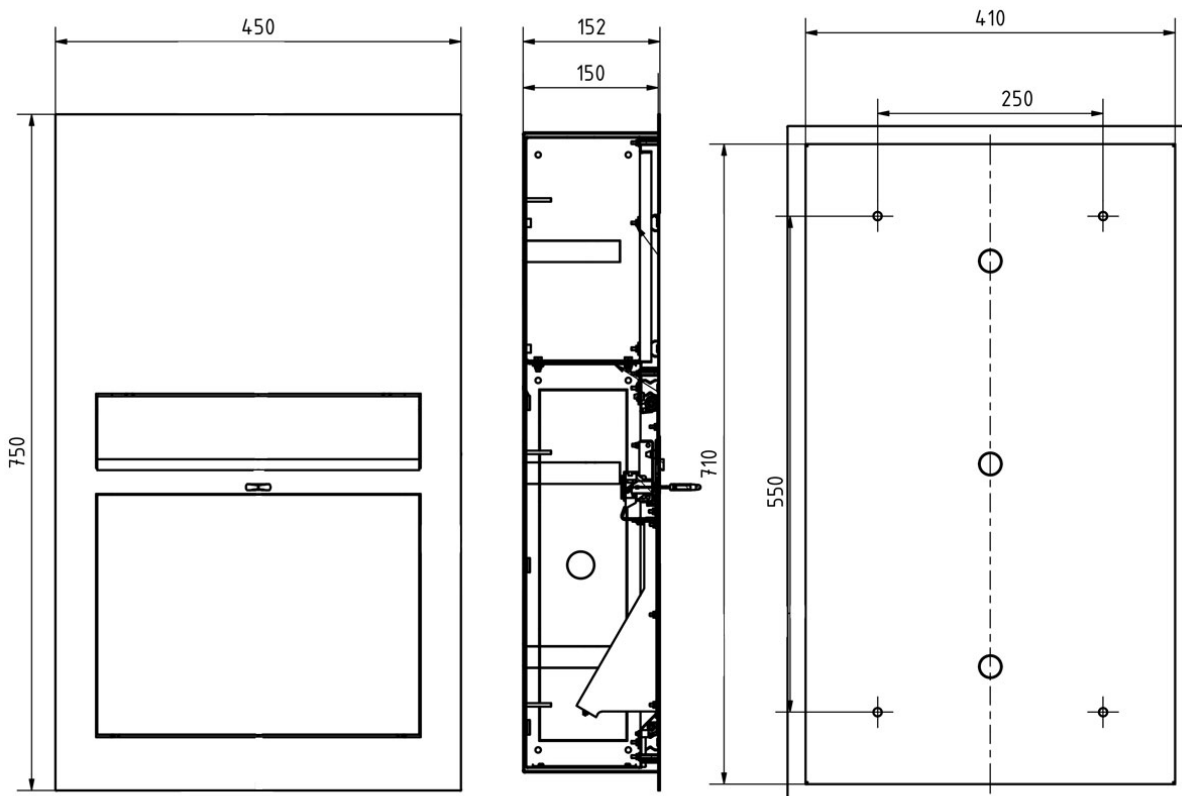

Product properties

Series	GRIMM
Connection technology	2-wire, LAN
Number of bell push buttons	1 button
Functions	Camera, Intercom, Fingerprint
Functional box prepared for manufacturer	Comelit
Material	Stainless steel V2A 1.4301, Stainless steel 1.4016 (non-rusting magnetic stainless steel)
House number	House number as laser engraving
Name labelling	Laser-engraved
Removal of mail	On the front
Number of boxes	with 1 letterbox
Surface/colour	Brushed
Boxes by volume	Large > 16 litres
Mounting type	Surface-mounted

Dimensions

Height of single box in mm	460,0
Width of single box in mm	410,0
Capacity in litres	26,0
Height of letterbox slot in mm	35,0
Width of letter slot in mm	325,0
Height of letterbox in mm	External dimension 750.0 installation dimension 710.0
Width of letterbox system in mm	External dimension 450.0 installation dimension 410.0
Total width in mm	External dimension 450.0 installation dimension 410.0
Depth in mm	150,0
Weight in kg	19
Delivery condition	Delivery is assembled
