

STR hands-free video station VFS35 in white

Product number BMLSTR33386W

Product description

STR hands-free video station VFS35 in white

The VFS35 video indoor station is characterised by a very simple, clear operating concept. Two easily recognisable buttons on the front are sufficient for answering calls and opening doors in everyday use. Advanced functions and settings can be operated as easily as on a mobile phone using two function buttons on the side and a rocker button. The VFS35 also impresses with a brilliant display and excellent voice quality.

- for Qwikbus 2-wire technology.
- Brilliant 3.5" (8.9 cm) widescreen TFT monitor.
- Display resolution: 320x240 pixels.
- Automatic and manual image switching.
- Consistent two-wire technology: only two wires for audio and video signals including power supply.
- Digital voice processing for excellent voice quality.
- Two function buttons on the side and a rocker button for less frequently used settings and additional functions.
- 8 selectable ring tones for the door call and fixed storey call with call differentiation between different external door stations and storey call.
- Volume with visual and acoustic feedback can be adjusted in stages via the OSD menu.
- Visual display for call muting.
- Flashing signal light can be switched on for visual signalling of the door call.
- Contrast, colour and brightness adjustable via OSD menu.
- Retrieval and viewing of stored images from the video camera of door calls during absence (the BS333 image memory must be installed as a system extension for this).
- Listening and viewing lock.
- For surface mounting on the wall or on a standard switch box.
- Dimensions W 107 x H 152 x D 20 mm.
