Product number 562-STLPK-SPR-SF-GI106KS

Product description

Design letterbox pillar GRIMM with GIRA System 106 video intercom - The premium solution for post & parcels

The GRIMM designer letterbox pillar combines modern design, high-quality workmanship and maximum flexibility. Made from **2 mm V2A stainless steel** and powder-coated in a **colour of your choice**, the pillar impresses with its timeless elegance and extreme robustness. Thanks to the **fully welded construction**, there are no visible screws or rivets, creating a particularly elegant appearance. The **letterbox and parcel box module** is also fitted with invisible screws - for an elegant look at the highest level.

Particularly practical: the modules can be replaced even after many years. This means that your letterbox parcel post remains flexible and future-proof at all times. This model is **manufactured by Briefkasten Manufaktur in Bad Salzuflen** - quality work "Made in Germany".

A special feature of the system is the tried-and-tested mechanical parcel lock with T-handle, which enables delivery without a delivery person: the delivery person places the parcel in the open compartment and locks it with a simple click. The compartment remains locked until the authorised user opens it with their key. A clever solution - without electronics, without an app, but with maximum security. Whether DHL, UPS, DPD, GLS, Hermes or TNT - any parcel service can use the parcel box. This means you can receive your parcels securely and conveniently at any time, even when you are not at home.

The GRIMM letterbox is not only a visual highlight, it is also at the forefront in terms of functionality and quality. Thanks to the innovative push-key lock, the letterbox can be operated easily and conveniently with one hand. Open the door with one push and close the door without using a key. The lock is optimally protected from the weather. The letterbox also offers an intelligent removal system: the door opens from top to bottom, ensuring that the mail remains securely in the box and cannot fall towards you. Mail is also conveniently inserted from the front, with high-quality axle dampers ensuring that the flap closes gently. The elegant, flush-mounted design of this letterbox with GIRA System 106 enables the installation of up to three system modules in a stable yet flexible mounting system. Three GIRA 106 system modules are already included in the scope of delivery so that the letterbox is ready for immediate use. In addition, the matching GIRA home station and the necessary control unit are included to provide a complete solution for your video intercom system in the letterbox. Thanks to the sophisticated mounting system, the GIRA modules can be easily replaced or extended at any time. This keeps your system flexible, modern and future-proof.

Thanks to the DIN/EN 13724 standard, the GRIMM is ideal for large letters in C4 format, which can be inserted without creasing. The GRIMM letterbox impresses with its durable quality, timeless design and sophisticated functionality.

Letterbox module with function box - convenience and functionality

Construction & details

- Fully welded upright made of 2 mm stainless steel V2A 1.4301, powder-coated in the colour of your choice.
- Overall height: 1.70 m.
- Invisible cable feed through the body possible.
- Base plate made of stainless steel (10 mm thick), concealed by elegant cover panel.
- No visible screws or rivets - seamless design.
- Modules can be replaced even years later - maximum future-proofing.

Important information:

To achieve optimum water protection for your mail, the letterbox or letterbox system should be located under a canopy if possible.

The mail is only protected from water if it is fully inserted in the box and the flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the letterbox. This system is protected against the ingress of water in accordance with DIN EN 13724. Water ingress is not a reason for complaint.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
