

1400mm for screw mounting

Product number HF1400PLAIN

Product description

High-quality stand element made of V2A stainless steel, polished for screw mounting with base plate. The stand element is welded at the upper end part and has a perforation at the bottom so that cable routing is possible without any problems. If cable routing is required (only for items with bell intercom part), an inner perforation is enlarged so that a cable feed-through (always on the right when viewed from the front, 14 mm) is possible.

Length 1400mm

Dimensions 20mm x 100mm

Wall thickness 2 mm

Base plate thickness 10 mm
