**Product number** 592DBR-V-GI106-L-UP150

## Product description

### Stainless steel letterbox designer model BIG with GIRA System 106 on the side - RAL of your choice - 3-gang prepared

High-quality letterbox from the Briefkasten Manufaktur brand in an extra-large format. The Gira System 106 can be used seamlessly in a flush-mounted design. The preparation is intended for 3 GIRA 106 system modules. The modules can be flush-mounted using the simple mounting system (surface-mounted housing 5503910 required!).

This is a real eye-catcher among letterboxes. Clear lines and no-frills design characterise the designer letterbox with GIRA System 106. Our products have a high quality, reliable functionality and their own identity. Made by Briefkasten Manufaktur.

- Designer stainless steel letterbox made of 2mm stainless steel V2A 1.4301, powder-coated to RAL colour; dimensions of individual box: height 550 mm; width: 600 mm; depth 100 mm.
- Front mail removal door 320 mm x 300 mm, opens from top to bottom. Incl. 2 keys with key number.
- Mail slot from the front, dimensions: W 32 cm x H 6.3 cm, C4 landscape. Very large letters fit in here without creasing. Attention, no removal protection!
- With built-in damping elements that allow the flap to close slowly and quietly.
- Flush-mounted or surface-mounted box dimensions: H 510 mm x W 560 x D 100. Flush-mounted box with pre-punched cable inlets and fixing points on all sides. Surface-mounted box for wall mounting with rear perforation, surface-mounted box for fence mounting without perforation (must be provided by customer).
- **WITHOUT GIRA system components!**

## Important information

Camera or intercom preparation

**The intercom systems must be connected by an electrician. Please contact your trusted electrician for planning, fitting and installation.**

Water protection

To achieve optimum water protection for your mail, the letterbox or letterbox system should be located under a canopy if possible.

The mail is only protected from water if it is fully inserted in the box and the flap is closed. Mail that is not fully inserted allows moisture and dirt to penetrate the letterbox. It is therefore necessary to plan sufficiently dimensioned letterboxes for the upcoming requirements. Under certain extreme weather conditions, water can still enter (up to 1ccm according to DIN EN 13724). This is not a reason for complaint.
