5 Freestyle Script

Product description

High-quality lettering of the house number as laser lettering. This is a high-quality, absolutely UV/weather-resistant laser inscription in a light or dark font colour depending on the RAL colour tone as a contrast (e.g. the inscription is lasered darker for light colours and lighter for darker colours). A specific choice of colour for the lettering is not technically possible here.

Lettering height 80-100mm

The font height refers to the height of the characters. Individual characters may deviate from this due to the font. This is a typographical standard and does not constitute a defect.
